Any and all exceptions to the specifications must be clearly stated for each heading. Use additional pages for exceptions, if necessary. #### PRICING

Prices shall be stated in units of quantity specified in the Bid Document. In case of a discrepancy in computing the amounts of the bid, the unit price bid will govern.

All quantities stated, unless indicated otherwise are estimates and the City reserves the right to increase or decrease the quantity at the unit price bid as best fits its needs.

#### AWARD

In the case of default by the contractor, the City of Rochester Hills, the City of Sterling Heights, City of Auburn Hills and/or City of Mount Pleasant may procure the articles from other sources and hold the bidder responsible for any excess cost occasioned thereby. In case of error by the bidder relating to a contract, the Purchasing Division may, by discretion, upon presentation of a written explanation by the bidder substantiating the error, reject the contract and award to the next qualified bidder, such error may be subject to default conditions.

#### CANCELLATION OF ORDERS:

Purchases made under this contract are for readily available supplies specified herein. Time is of the essence in furnishing the items ordered. Jurisdictions reserve the right to cancel the order and/or to refuse delivery if the items ordered are not furnished within a reasonable period of time or as specified in this contract.

#### METHOD OF PAYMENT:

## WARRANTY INFORMATION

Lion Apparel warrants that its fire fighter's protective products meet or exceed all applicable NFPA standards in effect at the time of their manufacture and further warrants that such products are free from any defect in workmanship or any patent material defect.

Conditions of use are outside the control of Lion Apparel. It is the responsibility of the user to inspect and maintain the products to assure they remain fit for their intended purpose. In order to maximize the useful life of these products, the products are to be used only by appropriately - trained personnel following proper fire fighting procedures and in accordance with the product's warning, use, and care instructions.

EXCEPT AS SET FORTH ABOVE, LION APPAREL MAKES NO OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY WARRANTIES OF MERCHANTABILITY OF FITNESS FOR ANY PARTICULAR USE.

Under the above warranties, Lion Apparel will repair or replace, at its option, any protective product which does not meet the above warranties. Such repair or replacement will be the purchaser's sole remedy and Lion Apparel will not be responsible for any incidental, consequential, or other damages based upon or arising in any way from any breach of the warranties contained herein or the purchaser's use of such product.

6oz. Pbi® outer shell: Experience has shown that six ounce outer shell fabrics exhibit reduced wear life and protective characteristics when compared to slightly heavier fabrics. Please note that Lion Apparel's Limited Lifetime Warranty against defects in materials does not include outer shells made from six ounce textiles.

These warranty obligations apply only to any product, part, or component which is returned to Lion Apparel or a Lion Authorized Clean and Repair Center with prior authorization and proof of purchase, and which Lion Apparel agrees to be defective as covered by this warranty.

The word "product" includes the product itself and any parts of labor furnished by Lion Apparel with the sales, delivery, or servicing of the product.

The term "useful life" means the length of time the garment can safely be worn for structural fire fighting activities, without needing major structural repairs that would be economically infeasible. (A general rule recommended by SAFER is that a garment should be retired when the costs of repair would exceed 50% of the replacement cost.) The useful life will vary from garment to garment, according to type and frequency of use, and the weight and type of materials used in the garment. Lighter weight outer shell fabrics will have a shorter useful life than heavier outer shell fabrics. In practical terms, the average useful life of a fire fighter garment undergoing normal wear in an active fire department is 3-5 years.

"Defects in Workmanship and Materials" means poorly manufactured seams, stitching, or components (for example, loose or broken seams; zippers or snaps that fall off or do not function properly); and fabrics or barriers which have such flaws as holes, uneven spots, weak areas, pilling, or other flaws caused by irregularities in their manufacture.

## EXCEPTIONS TO WARRANTY

This lifetime warranty does not cover the following items after receipt of garments by end user:

- A. Claims made after 60 days from the date of shipment for damage to 6 oz. outer shell fabrics;
- B. Damage from exposure of raw materials to ultraviolet light;
- C. Shade variations among textiles used;
- D. Damage caused by improper cleaning or maintenance (for example, use of chlorine or petrochemicals to clean);
- E. Damage caused by repair work not performed to factory specification;
- F. Damage from routine exposure to common fireground hazards which may cause rips, tears, burn damage, or abrasion;
- G. Loss of retroreflectivity of reflective trim due to normal wear or heat exposure;
- H. Detachment of reflective trim due to thread abrasion or heat exposure;
- I. Replacement of zippers worn partially sealed, or damaged by heavy wear and tear;
- J. Damage to outer shell fabrics in knees, elbows, shoulders, and cuff areas not protected by reinforcements.
