Local and Renowned Artist, David Barr, approached staff about loaning *Sonata*, a sixteen foot tall sculpture, to the City for a period of three years. This sculpture will be part of the current sculpture exhibit at Fuest Park for the next three seasons. The piece represents music and flow and will be located on the west side of the amphitheatre, next to the gardens.

David is generously donating the sculpture to the City for use during the specified time without a rental fee. The only fees incurred during the three year term will be relocating it to its next location and repainting the sculpture after our loan period is complete. The anticipated installation date is during the week of July 26. A press release and other promotional materials will follow the installation of the sculpture.
