

Cellular Tower at M-5 and Twelve Mile Road SP 08-40D

CELLULAR TOWER AT M-5 AND TWELVE MILE ROAD, SITE PLAN 08-40D

Public hearing on the request of SBA Towers, LLC, for Planning Commission's recommendation to the City Council for Special Land Use Permit, and Preliminary Site Plan. The subject property is located at the southwest corner of Twelve Mile Road and the M-5 connector, in Section 13. The subject property is approximately 2 acres and the applicant is proposing to build a 150-foot tall cellular phone monopole tower, associated equipment shelters and accessory structures.

Required Action

Recommend approval/denial of the Special Land Use Permit and Preliminary Site Plan to the City Council.

| REVIEW | RESULT | DATE | COMMENTS |
|-------------|-----------------------------|---------|---|
| Planning | Approval Not Recommended | 3/29/10 | Substantial information demonstrating the location is essential for service or desirable for the public welfare or convenience not provided Substantial data demonstrating that it is not feasible to co-locate on existing sites or structures not provided ZBA variance for gravel drive and parking space (staff supports) Equipment screening requires waiver from City Council Relocate or obtain ZBA variance to place structures in right-of-way |

<u>Motions</u>

Recommend Approval – Special Land Use Permit

In the matter of Cellular Tower at M-5 and Twelve Mile Road, SP08-40D, motion to recommend City Council **approval** of a <u>Special Land Use Permit</u> for a cell phone monopole tower, associated equipment structures and accessory structures subject to the following:

- a. Site Plan approval by City Council; and
- b. (additional conditions here)

For the reasons that the Planning Commission finds that the proposed tower meets the requirements of Section 2508.1 of the Zoning Ordinance as follows:

- a. The use is essential or desirable to the public convenience or welfare;
- b. The use is compatible with the orderly development of the OST, Planned Office Service Technology, zoning district and will not be detrimental to the orderly development, environment or use of adjacent properties and/or zoning districts;
- c. Denial of the request will prohibit or have the effect of prohibiting the provision of wireless services;
- d. The applicant has provided sufficient information demonstrating that it is not feasible to co-locate on existing facilities; and
- e. (additional findings here if any)

for the reasons that the Planning Commission finds that relative to other feasible uses of the site, the proposed use:

- a. Will not cause any detrimental impact on existing thoroughfares or the capabilities of public services and facilities;
- b. Is compatible with the natural features and characteristics of the land and adjacent uses of land;
- c. Is consistent with the goals, objectives and recommendations of the City's Master Plan for Land Use;
- d. Will promote the use of land in a socially and economically desirable manner;
- e. Is (1) listed among the provision of uses requiring special land use review as set forth in the various zoning districts of this Ordinance, and (2) is in harmony with the purposes and conforms to the applicable site design regulations of the zoning district in which it is located; and
- f. (additional findings here if any)

<u>Recommend Denial- Special Land Use Permit</u>

In the matter of Cellular Tower at M-5 and Twelve Mile Road, SP08-40D, motion to recommend City Council **denial** of the <u>Special Land Use Permit</u> for a cell phone monopole tower, associated equipment structures and accessory structure for the following reasons:

- 1. The tower, shelter buildings and parking are located in MDOT right-of-way and therefore do not meet the setback requirements of the Zoning District;
- 2. The Planning Commission finds that the proposed tower and accessory structures does not meet the requirements of Section 2508.1. of the Zoning Ordinance as follows:
 - a. The proposed tower location is not in the I-1 or I-2 Districts, and the applicant has not demonstrated that the denial of the request would prohibit or have the effect of prohibiting the provision of personal wireless services, so as to contravene the provisions of 47 U.S.C. § 332(c)(7)(B)(i) because the provided propagation maps from two tentative cell phone carriers do not provide enough information to determine that if the proposed facility was not constructed, personal wireless service would be prohibited;;
 - b. The applicant has not demonstrated that the use is essential or desirable to the public convenience or welfare because the provided propagation maps from two tentative cell phone carriers do not provide enough information to determine that if the proposed facility was not constructed, personal wireless service would be prohibited;;
 - c. The highly visible location and the lack of stealth design of the proposed tower is not aesthetically compatible with the OST district;
 - d. The applicant has not provided sufficient information demonstrating that it is not feasible to co-locate on existing ITC/DTE facilities; and

(additional reasons here if any)

<u> Approval – Preliminary Site Plan</u>

In the matter of Cellular Tower at M-5 and Twelve Mile Road, SP 08-40D, motion to recommend City Council **approval** of the <u>Preliminary Site Plan</u>, subject to the following:

- a. Obtaining a variance from the ZBA for a gravel driveway except that for first 25 feet adjacent to Twelve Mile Road ;
- b. Obtaining a ZBA variance to permit structures in the MDOT right-ofway;
- c. Providing additional landscape screening or obtain a waiver from City Council;
- d. Planning Commission waiver of the right-of-way berm, street tree, understory trees or shrubs and irrigation requirements;
- e. The conditions and items listed in the staff and consultant review letters being addressed on the Final Site Plan; and
- f. (additional conditions here if any)

for the following reasons...(because it is otherwise in compliance with Article 23A, Section 2400 and Article 25 of the Zoning Ordinance and all other applicable provisions of the Ordinance).

Denial Preliminary Site Plan

In the matter of Cellular Tower at M-5 and Twelve Mile Road, SP 08-40D, motion to recommend City Council **denial** of the <u>Preliminary Site Plan</u>, for the following reasons:

because it is not in compliance with the setback requirements of Section 2400 of the Zoning Ordinance.

PLAN REVIEW CENTER REPORT

March 29, 2010

Planning Review

Cellular Tower at M-5 and Twelve Mile (SBA Towers) SP08-40D

Petitioner

SBA Towers, LLC

Review Type

Revised Preliminary Site Plan and Special Land Use Permit

Property Characteristics

Site Location: Southwest corner of Twelve Mile Road and M-5 Site Size: Less than 2 acres . OST, Planned Office Service Technology Zoning: 0 Surrounding Zoning: North: RA, Residential Acreage; and East, South and West: OST . North: Vacant residential and M-5 interchange; and East, South, Surrounding Land Uses: and West: M-5 and interchange Walled Lake Consolidated School District: Proposed: 150 foot cellular phone tower and accessory structures Plan Date: March 16, 2010

Project Summary

The applicant proposes to build a 150 foot tall monopole cellular phone tower and attach one MDOT CCTV camera to the pole and provide room for future cellular phone antenna arrays. The site is leased State of Michigan right-of-way property located at the southwest corner of Twelve Mile Road and M-5 between the south bound M-5 entrance ramp and the southbound M-5 highway. The applicant has indicated that <u>associated equipment shelters</u>, accessory structures and antennas for specific carriers will be submitted at a later date under separate <u>permit</u>. The proposed tower is designed to accommodate six cell phone carriers and antenna arrays. The applicant proposes some landscape screening on all sides of the site outside of the leased area. In addition to the tower, a ground mounted electrical transformer, electrical meter equipment, landscaping, driveway improvements and fencing is proposed at this time. The applicant is proposing to complete the driveway improvements after MDOT closes a cement batch plant that it has permitted just south of the site.

Recommendation

At this time the Planning Staff **does not recommend approval** because the submitted application does not meet the standards of the Zoning Ordinance, specifically:

 Substantial information demonstrating the location is essential for service or desirable for the public welfare or convenience was not provided; Planning Review of Revised Preliminary Site Plan and Special Land Use PermitMarch 29, 2010CELLULAR TOWER AT M-5 AND TWELVE MILE (SBA TOWERS)Page 2 of 8SP# 08-40DPage 2 of 8

- Substantial data demonstrating that it is not feasible to co-locate on existing sites or structures was not provided;
- The proposed gravel parking spaces and access aisles are required to be paved and thus a **variance is required from the Zoning Board of Appeals** for a gravel drive and parking space (staff could support this variance);
- The proposed equipment screening is not adequate and would require a waiver from City Council; and
- The proposed future accessory structures and parking do not meet setback requirements because it they are located in the right-of-way and thus a **variance is required from the Zoning Board of Appeals** to locate the proposed facilities at this site.

The applicant was asked to provide additional application material demonstrating the location is essential for service or desirable for the public welfare or convenience and that it is not feasible to co-locate on existing sites or structures prior to the matter proceeding to the Planning Commission. The revised Site Plan now includes a MDOT camera mounted near the top of the tower. No material was provided demonstrating that this location is needed for the camera or that co-location on existing facilities is not possible. The current revised submittal also included additional narrative regarding cell phone coverage for two potential carriers, neither of whom are part of this application. Technical details explaining the maps was not provided. The applicant previously provided an affidavit stating that DTE controlled the lease of the ITC towers and the ITC headquarters building was not available co-location. The City has not received anything from ITC or DTE stating the ITC towers could not be used for co-location. Currently, four of the sixteen ITC towers located within 21/4 miles north of the site have communication antennas attached. A detailed discussion follows below.

Comments:

Preliminary Site Plans and Special Land Use Permits for new communications towers require approval from the City Council after a public hearing, review and recommendation from the Planning Commission. The Zoning Ordinance recognizes that communication towers service an area beyond the City but they also can create potential control problems as they relate to adjacent land uses and appearance.

Section 2508.1. of the Zoning Ordinance states

a. The City Council may permit a communication antenna or pole in non-industrial zoning districts when it finds that such restrictions would prohibit or have the effect of prohibiting the provision of personal wireless services, so as to contravene the provisions of 47 U.S.C. § 332(c)(7)(B)(i). The relief granted shall be the minimum necessary to eliminate such an effect."

b. The following criteria shall be considered in the recommendation of the Planning Commission, and decision of the City Council:

(1) Whether the requested use is essential or desirable to the public convenience or welfare;

(2) Whether the proposed antenna tower or pole is of such location, size and character as to be compatible with the orderly development of the zoning district in which it is situated, and shall not be detrimental to the orderly development, environment or use of adjacent properties and/or zoning districts. Consideration will be given to applications which present a creative solution to proliferation of antennas,

(3) Whether denial of the request will prohibit or have the effect of prohibiting the provision of personal wireless services.

Planning Review of Revised Preliminary Site Plan and Special Land Use PermitMarch 29, 2010CELLULAR TOWER AT M-5 AND TWELVE MILE (SBA TOWERS)Page 3 of 8SP# 08-40DSP# 08-40D

The Zoning Ordinance sets these high standards of review in order to protect the public from a proliferation of towers and poles in undesirable locations.

Federal law cited above, specifically preserves local zoning authority over wireless communications facilities provided the local ordinance:

- (1) Does not discriminate among providers; functionally equivalent services,
- (2) Does not prohibit wireless services;
- (3) The local government acts within a reasonable time; and
- (4) If the application is denied, the local government provides its denial in writing supported by substantial evidence contained in the written record.

In staff's opinion, the application is not supportable because the applicant has failed to provide the following information:

- Substantial information demonstrating the location is essential for cellular phone service or desirable for the public welfare or convenience was not provided; and
- Substantial data demonstrating that it is not feasible to co-locate on existing sites or structures was not provided.

The Preliminary Site Plan and Special Land Use request was reviewed under the general requirements of Article 23, Planned Office Service Technology (OST) District, and Section 2400, the Schedule of Regulations of the Zoning Ordinance, and other sections of the ordinance, as noted. Items in **bold** below must be addressed by the applicant or City Council before Site Plan approval may be granted. Items underlined may be addressed at the time of Final Site Plan review. Please see the attached Planning Review Summary Chart for information pertaining to ordinance requirements.

- 1. Schedule of Regulations The future shelter buildings (to be applied for later) and parking areas are required to meet the setback and height requirements listed in Section 2400 for the OST district. The proposal <u>does not demonstrate compliance with the minimum setback requirements for buildings and parking</u>. The site compound is within the M-5 road right-of-way and thus the shelters and parking area do not meet the setback requirements for buildings and parking. The applicant is asked to relocate the proposal to a place where they can meet the set back requirements of the zoning district or obtain a variance from the Zoning Board of Appeals for the location of the shelter building and parking in the right-of-way.
- 2. Parking Spaces (Section 2505 and 2506) The Zoning Ordinance does not specify a parking requirement for this use. One parking space is provided and should be adequate to serve the site. The Planning Commission may determine the parking requirement for an unlisted use with a recommendation from the City's Traffic Consultant. The City's Traffic Consultant's review of October 22, 2009 recommends one parking space. The Zoning Ordinance requires all commercial parking spaces and drives to be paved with asphalt or concrete. The applicant is proposing gravel drive and parking space. The applicant is asked to pave the drive and parking space or seek a Zoning Board of Appeals variance

Planning Review of Revised Preliminary Site Plan and Special Land Use PermitMarch 29, 2010CELLULAR TOWER AT M-5 AND TWELVE MILE (SBA TOWERS)Page 4 of 8SP# 08-40DSP# 08-40D

from the paving requirement. <u>Staff supports this variance</u> since cell tower sites typically generate little traffic and because the City's Design and Construction Standards permits the City Engineer to allow non-paved access and parking for private utility facilities.

- **3. Special Requirements** (Section 2508.1.) City Council may waive any of the requirements of Section 2508.1 regarding communication towers if the Council finds that the requested use is essential or desirable to the public convenience or welfare, or whether the denial of the facility, as proposed, would prohibit, or in effect prohibit, wireless services and whether the size, location and character of the proposal is compatible with the orderly development of the district, environment and use of adjacent properties.
 - Essentiality and Compatibility (Section 2508.1.a. and b.) The applicant proposes a standard style 150 foot tall (including appurtenances) gray painted monopole communications tower. Communication towers are permitted in the I-1 and I-2 industrial districts and may be permitted in all other districts if the City Council determines that the requested use is essential or desirable to the public convenience or welfare, or whether the denial of the facility would prohibit or in effect prohibit wireless services and whether the size, location and character of the proposal is compatible with the orderly development of the district, environment and use of adjacent properties. Section 2508.1.a states that City Council may vary the standards of Section 2508 if they determine the proposal meets the above requirements. The applicant provided some information to demonstrate these items.

Only an MDOT camera is proposed on the tower at this time. <u>No information</u> was provided by MDOT requesting this location or demonstrating that they need a camera mounted at the proposed 145 feet. A camera mounted at 145 feet could view objects on the horizon about 14 miles distance. M-5 ends 4 miles north of this site. About ³/₄ miles south of the proposed tower site, two 90 foot tall ITC transmission line towers exist within the MDOT right-of-way. Cameras mounted on either of these structures could be able to see objects on the horizon about 11 miles away.

The applicant provided completed SBA applications from T-Mobile and Verizon to locate on the proposed tower. The applicant has provided an "indoor coverage" propagation map for T-Mobile demonstrating existing and expanded indoor coverage with a facility on the proposed tower and existing and proposed propagation maps for Verizon showing an increase in RSSI (dBm) demonstrating expanded coverage with a facility on the proposed tower. The applicant has stated that the maps show an increase in "green" areas that demonstrate best coverage areas. Technical details explaining the maps was not provided.

The applicant provided a short narrative stating that the proposed tower is compatible with the district and existing uses. The applicant has stated that due to the MDOT cameras a stealth design could not be considered. The color mock-up provided with the application shows two antenna arrays and an MDOT camera on the proposed tower although the proposed tower is designed to carry up to six antenna arrays.

Planning Review of Revised Preliminary Site Plan and Special Land Use PermitMarch 29, 2010CELLULAR TOWER AT M-5 AND TWELVE MILE (SBA TOWERS)Page 5 of 8SP# 08-40DPage 5 of 8

The Planning Staff notes that the proposed tower would be highly visible to traffic travelling down Twelve Mile Road or M-5. Locations further from the roadways would be aesthetically more appealing. A shorter tower or a stealth tower design with flush mounted antennas would also be aesthetically more appealing. Co-locating on existing structures would even be more appealing.

The applicant is asked to provide additional information demonstrating that the location is essential for service or desirable for the public welfare or convenience or seek a City Council determination that the proposed tower is essential for service or desirable for the public welfare or convenience.

Co-location (Section 2508.1.c) Applicants seeking approval of a new communications tower are required to provide information that demonstrates that it is not feasible to locate the proposed antennas on any existing structures. The applicant states that due to the proposed MDOT CCTV camera, they can not collocate on another facility. No information was provided by MDOT expressing a preference for this location or that other locations would not provide similar service. The applicant provided a map indicating the location of other towers. The applicant's previously submitted "Other Towers Map" did not depict all of the several ITC electrical transmission towers located within two miles of the site but did provide a note on the map indicating the location of a "string of ITC towers." The applicant provided an e-mail from T-Mobile (a potential carrier) stating that ITC would not permit co-location on their nearby 90-foot plus electrical transmission line towers or their headquarters building. The applicant also provided an affidavit stating that they contacted ITC and they were informed by ITC that they were unlikely to grant permission to locate on their headquarters building and that DTE Energy and not ITC had the authority to grant leases on the ITC transmission line towers. The applicant did not provide a statement from ITC or DTE on this matter. Currently, four of the sixteen ITC towers within 21/4 miles north of the site have communication antennas. The applicant is asked to provide additional information from MDOT regarding camera locations, an inventory of tall structures in the vicinity and additional information that demonstrates that locating in these locations is not feasible or provide evidence supporting a waiver and request a waiver of the requirement from City Council

Further, Section 2508.1.c. of the Zoning Ordinance requires applicants to provide a letter of intent to lease excess space and commit itself to the following:

- Respond to any requests for information from another potential shared use applicant;
- Negotiate in good faith and allow for leased shared use if an applicant demonstrates that it is technically feasible, and
- Make no more than a reasonable charge for a shared use lease.

The applicant has provided an affidavit of intent that meets the requirements of Section 2508.1.c.

Planning Review of Revised Preliminary Site Plan and Special Land Use PermitMarch 29, 2010CELLULAR TOWER AT M-5 AND TWELVE MILE (SBA TOWERS)Page 6 of 8SP# 08-40DPage 6 of 8

- **Required Notes** (Section 2508.1.d., f. and j. All required notes are on the Site Plan (see attached Summary Chart for details).
- Equipment Structures (Section 2508.1.g.) All equipment shelters must be constructed of face brick on all sides and have gabled roofs unless City Council waives the requirement. The applicant has depicted "future" equipment structures that meet the requirements of the Ordinance and provided notes on the plan states that details for a specific provider will be submitted separately and "Future equipment shelters to be clad in brick or panel brick with a gabled roof."
- Outdoor Equipment (Section 2508.1.h.) All equipment must be placed in 9 equipment buildings unless the City Council finds that due to site conditions or due to equipment design it is impractical to place the equipment in a building and that all outdoor equipment is screened from view on public roads and neighboring properties. The proposed outdoor equipment includes a transformer cabinet, a telco "H" frame structure, ice bridges and wave guide structures. In addition, the Verizon and T-Mobile applications to SBA indicate a desire to have a generator and three equipment cabinets outside of the equipment shelters. Along with a note stating that the carriers will apply for separate permits, the site plan depicts all proposed carrier specific equipment to be placed in brick faced equipment buildings. The applicant proposes to place all the equipment and buildings inside of a six foot chain link fence with some landscaping outside of the leased compound along the west and south side of the fenced area. Although the road surface of M-5 at the Twelve Mile Road overpass is over 10 feet higher than the compound and it will be difficult to screen the equipment from the view of the south bound motorist on M-5, the applicant is asked to increase the screening or seek a waiver from City Council.
- **Tower Height** (Section 2508.1.j.) The applicant proposes a 150 foot tall tower and antenna array and the maximum height permitted is 150 feet.
- Fall Zone (Section 2508.1.d.) Towers located on a site containing another use are required to be setback from all structures, driveways and parking areas by at least 40% of the height of the tower (63.2 feet). When the structure is setback less than 100% of the tower height, data must be provided showing that the tower is designed to keep from falling outside of the 40% fall zone. Roads (including freeway ramps) are considered structures and thus the above tower setbacks pertain. Setbacks are measured from all road surfaces, including the maintained shoulder. The proposed tower meets these requirements. The applicant has submitted data demonstrating that if the tower fails it will only fall within a distance equal to or less than 40% of its height and place the tower at least 40% of the height of the tower from all road surfaces. This is in the form of an engineer's evaluation.
- **Outdoor Lighting** (Section 2511) If the applicant is proposing any outdoor lighting, the applicant is asked to <u>submit fixture details</u>, including any fixtures used to illuminate the tower, and a <u>photometric plan</u> as required by Section 2511.

Planning Review of Revised Preliminary Site Plan and Special Land Use PermitMarch 29, 2010CELLULAR TOWER AT M-5 AND TWELVE MILE (SBA TOWERS)Page 7 of 8SP# 08-40DPage 7 of 8

- Future antennas, equipment shelters and accessory equipment (Section 2509.1.k.) If the proposed tower is approved and constructed, site plan approval for future antennas, equipment shelters and accessory equipment may be granted administratively if all other conditions of the Zoning Ordinance are met.
- **4. Special Land Use Considerations** Communications towers require Special Land Use approval and thus are subject to meeting the requirements of Section 2516.2(c). The City Council in exercising its discretion over site plan approval should consider the following factors relative to other feasible uses of the site:
 - Whether the proposed use will cause any detrimental impact on existing thoroughfares in terms of overall volumes, capacity, safety, vehicular turning patterns, intersections, view obstructions, line of sight, ingress and egress, acceleration/deceleration lanes, off-street parking, off-street loading/unloading, travel times and thoroughfare level of service.
 - Whether the proposed use will cause any detrimental impact on the capabilities of public services and facilities, including water service, sanitary sewer service, storm water disposal and police and fire protection to service existing and planned uses in the area.
 - Whether the proposed use is compatible with the natural features and characteristics of the land, including existing woodlands, wetlands, watercourses and wildlife habitats.
 - Whether the proposed use is compatible with adjacent uses of land in terms of location, size, character, and impact on adjacent property or the surrounding neighborhood.
 - Whether the proposed use is consistent with the goals, objectives and recommendations of the City's Master Plan for Land Use.
 - Whether the proposed use will promote the use of land in a socially and economically desirable manner.
 - Whether the proposed use is (1) listed among the provision of uses requiring special land use review as set forth in the various zoning districts of this Ordinance, and (2) is in harmony with the purposes and conforms to the applicable site design regulations of the zoning district in which it is located.

5. Other Issues

- **Pre-Construction Meeting** Prior to the start of any work on the site, Pre-Construction (Pre-Con) meetings must be held with the applicant's contractor and the City's consulting engineer. Pre-Con meetings are generally held after Stamping Sets have been issued and prior to the start of any work on the site. There are a variety of requirements, fees and permits that must be issued before a Pre-Con can be scheduled. Contact Sarah Marconi for a sample checklist or to schedule a Pre-Construction Meeting at 248-347-043 vrfv0 or smarchioni@cityofnovi.org.
- Address An address must be assigned before a building permit is issued. Recommend filing an address application (available at <u>http://www.cityofnovi.org/Resources/Library/Forms/Bldg-AddressesApplication.pdf</u>) to the Community Development Department, at the time of submitting a Final Site Plan.

6. Response Letters A letter from either the applicant or the applicant's representative addressing comments in this, and in the other review letters, is requested <u>with any subsequent submittal and prior to the matter being reviewed by the Planning Commission.</u> The letter must highlight all changes made to the plans and address each of the comments listed in all review letters and with any conditions of City Council approval.

Please contact Mark Spencer at (248) 735-5607 or <u>mspencer@cityofnovi.org</u> with any questions or concerns.

PLAN REVIEW CENTER REPORT

March 29, 2010 <u>Revised Preliminary Landscape Review</u> Cellular Tower M-5/ Twelve Mile SP#08-40C

Review Type

Revised Preliminary Landscape Review / Special Land Use

Property Characteristics

- Site Location: M-5
- Site Zoning: OST
- Plan Date: 2/26/10

Recommendation

Approval of the Preliminary Site Plan for 08-40D Cellular Tower is recommended provided the applicant receives the necessary waivers from the Planning Commission.

The project is unique in both due to its use and placement within the right-of-way. The Planning Commission is asked to consider the Staff comments listed below in light of the unique project purpose and location and in regard to typical requirements within OST zoning districts. The Applicant is asked to please address all other minor comments upon Final Site Plan Submittal. Please note that the City of Novi recently cooperated with the Michigan Department of Transportation on a joint effort tree planting project for all 4 quadrants of this interchange. A total of 150 deciduous and evergreen trees of mixed species have been planted.

Ordinance Considerations

Adjacent to Residential - Buffer (Sec. 2509.3.a.)

1. The project site is not directly adjacent to residential properties.

Adjacent to Public Rights-of-Way - Berm (Wall) & Buffer (Sec. 2509.3.b.)

- The entirety of the project is within the right-of-way. The tower itself cannot be buffered through the use of landscape. Typically development on properties zoned OST would be required to install a 3' high berm or wall along right-of-ways. This is not practical on this site. Site grades do not allow for the installation of a berm over much of the surrounding area due to the presence and grades of the freeway ramps and existing pond. Installation of a berm would require the removal of numerous existing mature trees that are proposed to be preserved. The southbound M-5 ramp connecting to other freeways is elevated over the facility, making any berm along the ramp ineffective for effective screening. Given the site circumstances, Staff supports a Planning Commission waiver for a berm along the right-of-way frontage.
- 2. Outdoor service structures such as those proposed are required to be screened. The Applicant should add additional understory trees or large shrubs to further buffer the fenced are. Alternately, the Applicant could seek a Planning Commission waiver for the screening. Staff would not support the waiver.

Street Tree Requirements (Sec. 2509.3.b.)

 One Canopy Street Tree per 35 LF is typically required between any proposed bike path / sidewalk and roadway. No walkways are proposed due to the project location. Further, MDOT and transportation safety issues preclude the planting of street trees along these right-of-ways. Staff supports a Planning Commission waiver for the required street trees.

Parking Landscape (Sec. 2509.3.c.)

1. No formal parking area is proposed for the project.

Building Foundation Landscape (Sec. 2509.3.d.)

 A 4' wide landscape bed is typically required along all building foundations with the exception of access points. An area 8' wide multiplied by the length of building foundations is typically required as foundation landscape area. Due to the nature of the facility and the need for continued access, a landscape bed is not practical for the small building proposed. Staff supports a Planning Commission waiver for the required building foundation landscape.

Plant List (LDM)

1. A Plant List has been provided per Ordinance requirements.

Planting Details & Notations (LDM)

1. Plan Details and Notations have been provided.

Irrigation (Sec. 2509 3.f.(6)(b))

1. All landscape areas are typically required to be irrigated. It would be cost prohibitive to provide irrigation to this site, and the applicant has proposed the use of native plants with relatively low water requirements. Staff would support a Planning Commission waiver for the site irrigation.

General Notes

1. There appear to be several trees shown to be removed on the north side of the proposed access road that do not seem to be affected by any aspect of the development. The Applicant should clarify the reason for the proposed removal with the City's Landscape Architect.

Please follow guidelines of the Zoning Ordinance and Landscape Design Guidelines. This review is a summary and not intended to substitute for any Ordinance. For the landscape requirements, see the Zoning Ordinance landscape section on 2509, Landscape Design Manual and the appropriate items in the applicable zoning classification. Also see the Woodland and Wetland review comments.

TRAFFIC REVIEW

1.00

June 30, 2010

Barbara McBeth, AICP Deputy Director of Community Development City of Novi 45175 W. Ten Mile Rd. Novi, Ml 48375

SUBJECT: SBA Cellular Tower (M-5 and 12 Mile), SP#08-40E Traffic Review of Fifth Revised Preliminary Site Plan

Dear Ms. McBeth:

At your request, we have reviewed the above and offer the following recommendation and supporting comments.

Recommendation

We can not recommend approval of the fifth revised preliminary site plan, since the driveway apron adjacent to 12 Mile Road is now proposed to be "stone" rather than asphalt as it was on the fourth revised preliminary site plan.

Project Description

What is the applicant proposing?

1. The applicant, SBA Towers LLC, proposes to construct a 145-foot monopole cellular communications tower within the property bounded by eastbound 12 Mile Road, the on-ramp to southbound M-5, and southbound M-5. A gated access drive is proposed on the south side of eastbound 12 Mile Road. Six cellular providers are planned collocate on the tower.

Traffic Study

Was a study submitted and is it acceptable?

2. No traffic study was submitted. The proposed facility would not generate enough new trips to warrant a study, based on the City's Procedures Manual.

Trip Generation

How much traffic would the proposed development generate?

3. Typically we would provide a trip generation table for the proposed land use within our traffic review, but no data is available from the Institute of Transportation Engineers (ITE) for the proposed communications tower. In our discussion with the applicant's engineer in 2009, a facility such as the one proposed generates approximately six visits per month by a

SBA Cellular Tower, 5th Revised Preliminary Site Plan (SP#08-40E), Traffic Review of 6-30-10, page 2

single vehicle (one monthly maintenance check by each of the approximately six providers that would collocate on the proposed tower).

Vehicular Access Locations

Do the proposed driveway locations meet City spacing standards?

- 4. A gated access drive is proposed on the south side of eastbound 12 Mile Road, and would follow the same general path as the existing gravel drive, which serves the MDOT construction staging area and temporary batch plant. One new curb cut and curbed driveway is proposed on the south side of eastbound 12 Mile, approximately 110 feet (measured center-to-center) east of the southbound M-5 on-ramp. We do not believe that the City's commercial driveway spacing standards (DCS Section 11-216.d.1.d) apply because the proposed driveway should not be considered a commercial driveway. Given the very limited volume of traffic to be generated by the proposed facility (approximately six vehicles per month), the location and visibility of the proposed gate, and the proposed signage (two "Authorized Vehicles Only" signs, one on either side of the driveway), we have minimal concern for the potential of traffic conflicts created by the proposed drive.
- 5. The driveway is now proposed to include a "stone" apron immediately behind the curb line of 12 Mile Road. This represents a significant change from the prior proposal of an asphalt apron, one we can not support due to its traffic safety implications. The absence of a paved driveway surface adjacent to 12 Mile will result in loose stones being occasionally thrown back onto the road, and could also result in less frequent and/or effective snow removal. The previously proposed 25-ft deep asphalt apron should be restored to the plan. (Note: The Design and Construction Standards, Sec 11-216(e)(9), authorizes the City to require the paving of such approaches "in a given location.")
- 6. The proposed utility structure driveway meets all of the Design Considerations included within Section 11.216.e of the City's Design and Construction Standards.
- 7. The revised plan includes a note on Page LP (Location Plan) stating that City emergency services will have access to the locked gate.

Vehicular Access Improvements

Will there by any improvements to the public road(s) at the proposed driveway(s)?

- 8. No improvements are proposed to eastbound 12 Mile Road. The proposed use is not expected to generate sufficient traffic to warrant a turn lane or taper.
- 9. The existing gravel drive is now accessible from the southbound M-5 on-ramp (via a gravel service area adjacent to the east shoulder of the ramp). This will be modified so that the sole point of access to the site will be via a new gated driveway on the south side of 12 Mile Road. Sheet C-2 (Site Grading Plan) provides a detail describing how this area would be cleared of aggregate and seeded. No change is proposed to the existing flat topography.

SBA Cellular Tower, 5th Revised Preliminary Site Plan (SP#08-40E), Traffic Review of 6-30-10, page 3

Driveway Design and Control

Are the driveways acceptably designed and signed?

10. The design standards for a Utility Structure Driveway (DCS Figure IX.6) have been met. Two "Authorized Vehicles Only" signs are proposed on either side of the new entrance, to deter motorists from mistaking it for a ramp onto M-5. Two "Turn Right Only" signs are proposed to deter authorized vehicles exiting the site from turning left into one-way traffic. The revised plan provides height and dimensions of proposed regulatory signs. Sign height has been reduced to the 5-ft rural standard, per our request.

Pedestrian Access

Are pedestrians safely and reasonably accommodated?

11. The proposed facility is not intended to accommodate pedestrians.

Circulation

Can vehicles safely and conveniently maneuver through the site?

12. The applicant has provided a turnaround at the east end of the driveway. No further improvements are necessary.

Parking Requirements

Is adequate on-site parking provided?

13. Section 2505.10 of the City's Zoning Ordinance states that for uses which do not have an off-street parking requirement listed in the Ordinance, the City's traffic consultant may make a recommendation to the Planning Commission. Birchler Arroyo recommends that the single parking space proposed on the east side of the service pad be deemed adequate off-street parking for the use proposed.

Sincerely, **BIRCHLER ARROYO ASSOCIATES, INC.**

ENGINEERING REVIEW

PLAN REVIEW CENTER REPORT April 8, 2010

Engineering Review

Cellular Tower M-5 SP08-40D

cityofnovi.org

Petitioner SBA Towers, LLC

SDA TOWERS, LLC

<u>Review Type</u>

Revised Preliminary Site Plan

Property Characteristics

- Site Location: Southwest corner of 12 Mile and M-5
- Site Size:2 acres
- Plan Date: 3-16-10

Project Summary

- Construction of a 150-foot tall monopole cellular tower on property owned by MDOT. Site access would be provided from 12 Mile at an existing access point currently used for a staging area.
- The access drive would be an 18-foot wide, gated access drive within a proposed 30-foot wide access and utility easement. An aggregate access drive is proposed over the existing gravel access drive, with a vehicle turn around area near the end. The drive would be paved from 12 Mile to the gate (~25 feet).

Recommendation

Approval of the Revised Preliminary Site Plan is recommended, with items to be addressed at Final Site Plan submittal.

Comments:

The Revised Preliminary Site Plan meets the general requirements of Chapter 11 of the Code of Ordinances, the Storm Water Management Ordinance and the Engineering Design Manual with the following exceptions, which can be addressed at Stamping Set submittal:

Engineering Review of Final Site Plan

Cellular Tower M-5 SP# 08-40D

<u>General</u>

1. As previously stated, a right-of-way permit will be required from the City of Novi and the Road Commission for Oakland County. Traffic signs in the RCOC right-of-way will be installed by RCOC.

The following must be submitted with the Stamping Set:

(Please note that all documents must be submitted together as a package with the Stamping Set submittal. Partial submittals will <u>not</u> be accepted).

2. An executed copy of the 30-foot access easement must be submitted to the Community Development Department.

The following must be addressed prior to construction:

- 3. A City of Novi Grading Permit will be required prior to any grading on the site. This permit will be issued at the pre-construction meeting (no application required). A grading permit fee in the amount of \$ 201.25 must be paid to the City Treasurer's Office.
- 4. Construction inspection fees in the amount of \$ 1,375.00 must be paid to the City Treasurer's Office.
- 5. A Soil Erosion Control Permit must be obtained from the City of Novi. Contact Sarah Marchioni in the Community Development Department, Building Division (248-347-0430) for forms and information. The financial guarantee and inspection fees will be determined during the SESC review.
- 6. A permit for work within the right-of-way of Twelve Mile Road must be obtained from the City of Novi. The application is available from the City Engineering Department or on the City website and may be filed once the Final Site Plan has been submitted. Please contact the Engineering Department at 248-347-0454 for further information. Only submit the cover sheet, standard details and plan sheets applicable to the permit.
- 7. A permit for work within the right-of-way of Twelve Mile Road must be obtained from the Road Commission for Oakland County. Please contact the RCOC (248-858-4835) directly with any questions. The applicant must forward a copy of this permit to the City.

Please contact Lindon Ivezaj at (248) 735-5694 with any questions.

APPLICANT RESPONSE LETTER(S)

SBA TOWERS II, LLC (SBA)

PLANNING REVIEW REPORT RESPONSE LANDSCAPE REVIEW REPORT RESPONSE ENGINEERING REVIEW REPORT RESPONSE TRAFFIC REPORT RESPONSE

PROPOSED CELLULAR TOWER M-5 AND 12 MILE ROAD NOVI, MICHIGAN

Black & Veatch Corporation • 30150 Telegraph Road • Suite 420 • Bingham Farms, MI 48025 USA • Telephone: 248.594.9330

PLAN REVIEW CENTER REPORT March 29, 2010 <u>Planning Review</u>

Cellular tower at M-5 and Twelve Mile (SBA Towers) SP08-40D

1. Schedule of Regulations.

The proposal <u>does not demonstrate compliance with the minimum setback requirements</u> for buildings and parking.

The applicant is asked to relocate the proposal to a place where they can meet the setback requirements of the zoning district or obtain a variance from the Zoning Board of Appeals for the location of the shelter building and parking in the right-of-way.

Per Mark Spencer's letter dated 5/18/2010, the zoning district boundaries "...do extend to the center of any public right-of-way." Under this analysis, the proposal is zoned OST. The OST setback requirements are 50 feet for buildings and 40% of the height of the tower from other uses, which is 63.2 feet in this case.

SBA's drawings show the setback distances to the edge of the pavement for the proposed buildings are:

North- +500 feet West- +200 feet East- +130 feet South- +700 feet to where the 12 Mile ramp and M-5 intersect

SBA's drawings show the setback distances to the edge of the pavement for the proposed tower are:

North- 582 feet West- 224 feet East- 185 feet South- +700 feet to where the 12 Mile ramp and M-5 intersect

SBA's proposed location greatly exceeds both the tower and building setback requirements for the OST district, and therefore, no variance is required.

Under the analysis that imposes the OST zoning district requirements on the proposed location, the proposed parking space would also be zoned OST and not Right-of-Way. Therefore, the regulations are satisfied and no variance is required.

2. Parking Spaces (Section 2505 and 2506)

The City's Traffic Consultant's review of October 22, 2009 <u>recommends one parking</u> <u>space</u>. The Zoning Ordinance requires all commercial parking spaces and drives to be paved with asphalt or concrete. The applicant is proposing gravel drive and parking

space. The applicant is asked to pave the drive and parking space or seek a Zoning Board of Appeals variance from the paving requirement. <u>Staff supports this variance</u>.

3. Special Requirements (Section 2508.1)

• Essentiality and Compatibility (Section 2508.1.a. and b.) Communication towers are permitted in the I-1 and I-2 industrial districts and may be permitted in all other districts if the City Council determines that the requested use is essential or desirable to the public convenience or welfare, or whether the denial of the facility would prohibit or in effect prohibit wireless services and whether the size, location and character of the proposal is compatible with the orderly development of the district, environment and use of adjacent properties. Section 2508.1.a states that City Council may vary the standards of Section 2508 if they determine the proposal meets the above requirements. The applicant provided some information to demonstrate these items.

Only an MDOT camera is proposed on the tower at this time. <u>No</u> <u>information was provided by MDOT</u> requesting this location or demonstrating that they need a camera mounted at the proposed 145 feet.

Please see enclosed e-mail from Michele Mueller, Traffic Signals Engineer with the Michigan Department of Transportation (MDOT). This e-mail confirms that MDOT would like to add a Closed Circuit TV (CCTV) camera to the proposed tower location.

The proposed site is both essential and desirable to the public convenience and welfare. MDOT intends to utilize this proposed site as part of their expansion, which will include coverage along I-96 from Novi to the Livingston County line. The proposed CCTV camera will provide the public with real time traffic information, which in turn facilitates better traffic incident management, along with freeway courtesy patrol dispatches. The CCTV camera will relay information back to the Michigan Intelligent Transportation Systems center which is the hub for surface transportation communications in the Metro Detroit area.

As previously stated, SBA has current applications for collocation on the proposed site from both Verizon and T-Mobile. Significant information was previously provided demonstrating the carriers' desire to collocate antennas on the proposed monopole tower facility. This proposed site is a high volume traffic area and is intended to improve and maintain continuous, uninterrupted voice and data services to customers living, working and traveling in the area. Both Verizon and T-Mobile have provided coverage maps, along with backup documentation, demonstrating how the proposed site will fill and enhance current coverage gaps, and allow for greater call volume in the area, especially during peak travel times.

• Outdoor Equipment (Section 2508.1.h) Although the road surface of M-5 at the Twelve Mile Road overpass is over 10 feet higher than the compound and it will be difficult to screen the equipment from the view of the south bound motorist on M-5, the applicant is asked to increase the screening or seek a waiver from City Council.

Please see enclosed Landscape Affidavit from SBA. SBA agrees to install, at a minimum, 15 Viburnum lantana (Mohican Viburnum) or Viburnum dentatum (Arrowwood Viburnum) at a height of 5 feet to provide supplementary understory screening. The proposed compound is fully screened on all sides, and SBA is willing to install additional landscaping, subject to MDOT's list of approved plantings, that the City of Novi deems reasonably necessary.

• **Outdoor Lighting** (Section 2511) If the applicant is proposing any outdoor lighting, the applicant is asked to <u>submit fixture details</u>, including any fixtures used to illuminate the tower, and a <u>photometric plan</u> as required by Section 2511.

As previously stated, there is no proposed outdoor lighting at the site.

4. Special Land Use Considerations (Sec. 2508.1.b. & c.) Communications towers require Special Land Use approval and thus are subject to meeting the requirements of Section 2516.2(c). The City Council in exercising its discretion over site plan approval should consider the following factors relative to other feasible uses of the site:

• Whether the proposed use will cause any detrimental impact on existing thoroughfares in terms of overall volumes, capacity, safety, vehicular turning patterns, intersections, view obstructions, line of sight, ingress and egress, acceleration/deceleration lanes, off-street parking, off-street loading/unloading, travel times and thoroughfare level of service.

A wireless facility is unstaffed, and accordingly, there will be no impact to the existing traffic patterns. The facility will not generate any traffic hazards or nuisances. This site will be visited on the average of once a month by maintenance personnel, and thus, the safety and efficiency of public streets will be maintained. Access will be provided via the existing driveway off of Twelve Mile Road. A gate is provided at the driveway entrance to avoid any trespassing into the proposed site. Site plans for this site show that adequate parking is provided. Off-street parking and off-street loading/unloading will not be necessary at this proposed site. • Whether the proposed use will cause any detrimental impact on the capabilities of public services and facilities, including water service, sanitary sewer service, storm water disposal and police and fire protection to service existing and planned uses in the area.

The only utilities necessary for this facility are electricity and telephone, both of which are SBA's and the carriers' responsibility. Site plans submitted together with this application, reflect that provisions have been made for utilities and access. As this facility is unstaffed, no drainage, sanitation, refuse disposal, water and sewer will be necessary. The facility is electronically monitored and connected to a sophisticated central computer system which will detect any breach of security or other danger. Existing police and fire protection is more than adequate to provide security for this facility.

• Whether the proposed use is compatible with the natural features and characteristics of the land, including existing woodlands, wetlands, watercourses and wildlife habitats.

SBA proposes to construct a 150' monopole antenna structure within the MDOT right-of-way at M-5 and Twelve Mile Road. The monopole antenna structure is similar to a light standard comparable to those currently located on M-5 and will have little or no aesthetic impact on the surroundings. With such a small footprint and the nature of surrounding uses, there will be little or no impact on the character of the locality, with no adverse effect on existing woodlands, wetlands, watercourses and wildlife habitats. In fact, enhanced wireless communications will have a positive influence on the development of this area. Due to the fact that SBA has been sensitive in selecting a site that will minimize the impact on the surrounding properties, the proposed facility will be compatible with the existing environment and will not result in the destruction, loss, or damage of any natural or scenic feature.

• Whether the proposed use is compatible with adjacent uses of land in terms of location, size, character, and impact on adjacent property or the surrounding neighborhood.

The monopole antenna structure is similar to a light standard. Due to the fact that SBA has been sensitive in selecting a site that will minimize the impact on the surrounding property, its facility will be compatible with the adjacent uses, existing environment and will not disrupt future development of the area. This facility will not have an adverse effect on the property values within the neighborhood but rather, enhanced wireless communications will have a positive influence in the development of this area. Due to the minimal size of the lease parcel and the nature of the surrounding uses, there will be little or no impact on the character of the locality, and in turn will provide much needed essential communications, including traffic monitoring.

• Whether the proposed use is consistent with the goals, objectives and recommendations of the City's Master Plan for Land Use.

The special use will be in harmony with the general and specific purposes of the City of Novi's zoning ordinance and with the regulations of the OST (Office Service Technology) District. The facility will also support the policies, goals and objectives of the City of Novi's Master Plan for Land Use.

• Whether the proposed use will promote the use of land in a socially and economically desirable manner.

SBA's small lease parcel site with approximate dimensions of 120'x 40' will be located on vacant MDOT property which could not feasibly be used for other (business, industrial, etc.) uses. Additionally, the current and future demands for quality wireless communications in industry, business, safety and emergency services are becoming increasingly important factors in the prosperous growth of communities. The MDOT CCTV camera will also provide critical traffic information to the City of Novi and the Metro Detroit area, making this a socially and economically desirable use of the property.

• Whether the proposed use is (1) listed among the provision of uses requiring special land use review as set forth in the various zoning districts of this Ordinance, and (2) is in harmony with the purposes and conforms to the applicable site design regulations of the zoning district in which it is located.

(1) Communications towers are listed as one of the uses requiring special land use review in the OST district. Preliminary Site Plans and Special Land Use Permits for new communications towers outside of the Industrial districts require approval from the City Council after a review and recommendation from the Planning Commission.

(2) The establishment, maintenance and operation of this facility will be wholly contained within the fenced lease compound $(120' \times 40')$. The proposed facility will be built to conform to the applicable site design regulations of the OST zoning district including the regulations concerning height and setbacks. Therefore, the special use will be in harmony with the general and specific purposes and the regulations of the OST zoning district.

6. Response Letters A letter from either the applicant or the applicant's representative addressing comments in this, and in the other review letters, is requested with any subsequent submittal and prior to the matter being reviewed by the Planning <u>Commission</u>. The letter must highlight all changes made to the plans and address each of the comments listed in all review letters and with any conditions of City Council approval.

Yes, we would like to add a CCTV to this tower location. I need to do some research at how high we need to be to get good images which I am working on....

>>> Joy Tiemeyer <<u>JTiemeyer@sbasite.com</u>> 2/11/2010 9:21AM >>>
Michele,

I put together a small set of information for you that I hope helps. You will see that there is a batch plant at the site temporarily but last fall we met with the batch plant operations and MDOT on site and worked out a plan that is going to allow us to both move forward. I am just in the process of making some slight modification to my plan so I can make any changes that I need to. Even if you need more height on the tower I can change that. Right now it is only 150 ft but that is because the City likes it that way and the applications that I have require 140' and 120 ft. I have no problem making it higher. It would be helpful if I knew fairly soon however.

Let me know if there is anything else that you need - I will be happy to send it.

Thanks Joy (517)622-8448 SBA's contractor will pay the permit fee in the amount of \$201.25 for the grading permit at the pre-construction meeting.

6. Construction inspection fees in the amount of \$1,375.00 must be paid to the City Treasurer's Office.

The construction inspection fees in the amount of \$1,375.00 will be paid to the City Treasurer's office.

7. A Soil Erosion Control Permit must be obtained from the City of Novi. Contact Sarah Marchioni in the Community Development Department, Building Division (248-347-0430) for forms and information. The financial guarantee and inspection fees will be determined during the SESC review.

SBA's contractor will apply for the soil erosion control permit from the City of Novi prior to the start of construction.

8. A permit for work within the right-of-way of Twelve Mile Road must be obtained from the City of Novi. The application is available from the City Engineering Department or on the City website and may be filed once the Final Site Plan has been submitted. Please contact the Engineering Department at 248-347-0454 for further information. Only submit the cover sheet, standard details and plan sheets applicable to the permit. **SBA's contractor will apply for a permit for work within the right-of-way of Twelve Mile Road from the City of Novi's City Engineering Department once the final site plan has been submitted.**

9. A permit for work within the right-of-way of Twelve Mile Road must be obtained from the Road Commission for Oakland County. Please contact the RCOC (248-858-4835) directly with any questions. The applicant must forward a copy of this permit to the City. SBA's contractor will apply for a permit for work within the right-of-way of Twelve Mile Road from the Road Commission for Oakland County. SBA's contractor will forward a copy of this permit to the City.

SBA Towers II, LLC. – Landscape Affidavit SBA site # MI11404-S SW M-5 Subject Location: SW corner of M-5 and Twelve Mile Road

To Whom It May Concern,

In response to comments received by David Beshke, landscape review dated March 29, 2010.

As a condition of approval, SBA Towers II, LLC agrees to install additional landscaping and understory trees to the proposed facility.

Per the suggestion of SBA's landscape consultant, Katheryn Maxwell Talty, ASLA of KM Talty Design, Inc., SBA proposes to install at a minimum 15 Viburnum lantana (Mohican Viburnum) or Viburnum dentatum (Arrowwood Viburnum) at a height of 5 feet to provide additional supplementary screening. It is estimated that the cost of the additional landscaping will be \$140 per planting.

The plant materials specified above are approved for use in right-of-ways by MDOT.

This affidavit is signed by a representative of the company authorized to commit the company.

SBA Towers II, LLC

PLAN REVIEW CENTER REPORT March 29, 2010 <u>Revised Preliminary Landscape Review</u> Cellular Tower at M-5 / Twelve Mile (SBA Towers) SP#08-40C

Revised Preliminary landscape review/Special Land Use dated March 29, 2010

Adjacent to Residential - Buffer (Sec. 2509.3.b.)

1. The project site is not directly adjacent to residential properties.

Adjacent to Public Rights-of-Way - Berm (Wall) & Buffer (Sec. 2509.3.b.)

1. The entirety of the project is within the right-of-way. The tower itself cannot be buffered through the use of landscape. Typically development on properties zoned OST would be required to install a 3' high berm or wall along right-of-ways. This is not practical on this site. Site grades do not allow for the installation of a berm over much of the surrounding area due to th presence and grades of the freeway ramps and existing pond. Installation of a berm would require the removal of numerous existing mature trees that are proposed to be preserved. The southbound M-5 ramp connecting to other freeways is elevated over the facility, making any berm along the ramp ineffective for effective screening. Given the site circumstances, **Staff supports a Planning Commission waiver for a berm along the right-of-way frontage.**

SBA will request a Planning Commission waiver from the required berm along the right-of-way frontage of the proposed site.

2. Outdoor service structures such as those proposed are required to be screened. The Applicant should add additional understory trees or large shrubs to further buffer the fenced area. Alternately, the Applicant could seek a Planning Commission waiver for the screening. Staff would not support the waiver.

Please see enclosed Landscape Affidavit from SBA. SBA agrees to install, at a minimum, 15 Viburnum lantana (Mohican Viburnum) or Viburnum dentatum (Arrowwood Viburnum) at a height of 5 feet to provide supplementary understory screening. The proposed compound is fully screened on all sides, and SBA is willing to install additional landscaping, subject to MDOT's list of approved plantings, that the City of Novi deems reasonably necessary.

Street Tree Requirements (Sec. 2509.3.b.)

1. One Canopy Street tree per 35 LF is typically required between any proposed bike path/sidewalk and roadway. No walkways are proposed due to the project location. Further, MDOT and transportation safety issues preclude the planting of street trees along these right-of-ways. Staff supports a Planning Commission waiver for the required street trees.

SBA will request a Planning Commission waiver from the requirement that street trees be planted along the right-of-way.

Parking Landscape (Sec. 2509.3.d.)

1. No formal parking area is proposed for the project.

Building Foundation Landscape (Sec. 2509.3.c.)

1. A 4' wide landscape bed is typically required along all building foundations with the exception of access points. An area 8' wide multiplied by the length of building foundations is typically required as foundation landscape area. Due to the nature of the facility and the need for continued access, a landscape bed is not practical for the small building proposed. However, the Applicant should consider the addition of massing of large native shrubs along the exterior of the proposed fencing to further buffer the visual impact of the facility. Staff supports a Planning Commission waiver for the required building foundation landscape.

Additional landscaping has been added to the east and to the north of the compound. Please see site plan pages LP, C-1 and L-1. SBA will request a Planning Commission waiver from the building foundation landscaping requirement. SBA has also agreed to install an additional 15 understory trees at 5 feet tall, per the City's request.

Plant List (LDM)

1. A Plant List has been provided per Ordinance requirements.

Planting Details & Notations (LDM)

1. Plan Details and Notations have been provided.

Irrigation (Sec. 2509 3.f.(6)(b))

1. All landscape areas are typically required to be irrigated. It would be cost prohibitive to provide irrigation to this site, and the applicant has proposed the use of native plants with relatively low water requirements. Staff would support a Planning Commission waiver for the site irrigation.

SBA will request a Planning Commission waiver from the irrigation requirement at the proposed site.

General Notes

1. There appear to be several trees shown to be removed on the north side of the proposed access road that do not seem to be affected by any aspect of the development. The Applicant should clarify the reason for the proposed removal with the City's Landscape Architect.

It is the opinion of SBA's Landscape Architect that the 4 trees to the north of the drive were too close in proximity to the proposed construction to be reasonably saved. The tree to the northwest is the furthest from the access road and will still be stressed, so it is also proposed to be removed. During the original evaluation in 2008, the trees were shown as 2" caliper and nothing special in variety. The plan is to replace them with larger, 2.5" caliper trees.

PLAN REVIEW CENTER REPORT April 8, 2010

Engineering Review Cellular tower at M-5 and Twelve Mile (SBA Towers) SP08-40D

Comments:

The Revised Preliminary Site Plan meets the general requirements of Chapter 11 of the Code of Ordinances, the Storm Water Management Ordinance and the Engineering Design Manual with the following exceptions, which can be addressed at Stamping Set submittal:

General

1. As previously stated, a right-of-way permit will be required from the City of Novi and the Road Commission for Oakland County. Traffic signs in the RCOC right-of-way will be installed by RCOC.

SBA will apply for a right-of-way permit from the City of Novi and the Road Commission for Oakland County prior to start of construction.

The following must be submitted with the Stamping Set:

(Please note that all documents must be submitted together as a package with the Stamping Set submittal. Partial submittals will <u>not</u> be accepted).

2. An executed copy of the 30-foot access easement must be submitted to the Community Development Department.

A fully executed copy of SBA's 30 foot access easement was contained within the Memorandum of License as Exhibit 3, which was previously submitted as Exhibit M. SBA has enclosed the document again, for reference.

The following must be addressed prior to construction:

3. A City of Novi Grading Permit will be required prior to any grading on the site. This permit will be issued at the pre-construction meeting (no application required). A grading permit fee in the amount of \$201.25 must be paid to the City Treasurer's Office.

SBA's contractor will pay the permit fee in the amount of \$201.25 for the grading permit at the pre-construction meeting.

4. Construction inspection fees in the amount of \$1,375.00 must be paid to the City Treasurer's Office.

The construction inspection fees in the amount of \$1,375.00 will be paid to the City Treasurer's office.

5. A Soil Erosion Control Permit must be obtained from the City of Novi. Contact Sarah Marchioni in the Community Development Department, Building Division (248-347-0430) for forms and information. The financial guarantee and inspection fees will be determined during the SESC review.

SBA's contractor will apply for the soil erosion control permit from the City of Novi prior to the start of construction.

6. A permit for work within the right-of-way of Twelve Mile Road must be obtained from the City of Novi. The application is available from the City Engineering Department or on the City website and may be filed once the Final Site Plan has been submitted. Please contact the Engineering Department at 248-347-0454 for further information. Only submit the cover sheet, standard details and plan sheets applicable to the permit.

SBA's contractor will apply for a permit for work within the right-of-way of Twelve Mile Road from the City of Novi's City Engineering Department once the final site plan has been submitted.

7. A permit for work within the right-of-way of Twelve Mile Road must be obtained from the Road Commission for Oakland County. Please contact the RCOC (248-858-4835) directly with any questions. The applicant must forward a copy of this permit to the City.

SBA's contractor will apply for a permit for work within the right-of-way of Twelve Mile Road from the Road Commission for Oakland County. SBA's contractor will forward a copy of this permit to the City.

MDOT #2010-

EXHIBIT 3 MEMORANDUM OF LICENSE

A. The State of Michigan, by its Department of Transportation ("the State"), having an address of 7050 West Saginaw Highway, Lansing, Michigan 48909, owns certain property located at 12 Mile Road/M-5, City of Novi, County of Oakland, and State of Michigan, and known on the tax map for said ______ as ______ (the "Property").

B. By way of that certain License Agreement dated ______, the State granted to SBA Towers II LLC ("SBA"), a Florida limited liability company having an address of 5900 Broken Sound Parkway N.W., Boca Raton, Florida 33487, the right to use a certain portion of the Property (the "Licensed Site") for the construction and operation of a communications tower and equipment shelters.

C. The State and SBA have agreed that SBA may, at its option, record a Memorandum giving notice as to SBA's interest in the Licensed Site.

Now, Therefore, the State and SBA represent as follows:

1. The Licensed Site is in the location as set forth on the plan attached hereto as Attachment "A".

2. The initial term of the License is <u>20 yrs</u> years, commencing on <u>_____</u>, and ending on <u>_____</u>. SBA may, at its option, renew the term of the License for <u>2</u> additional <u>5</u> year periods.

PLAN REVIEW CENTER REPORT March 31, 2010 <u>Traffic Review of Fourth Revised Preliminary Site Plan</u> Cellular tower at M-5 and Twelve Mile (SBA Towers) SP08-40D

Recommendation

We recommend approval of the fourth revised preliminary site plan.

Project Description

What is the applicant proposing?

1. The applicant, SBA Towers LLC, proposes to construct a 145-foot monopole cellular communications tower within the property bounded by eastbound 12 Mile Road, the onramp to southbound M-5, and the southbound M-5. A gated access drive is proposed on the south side of eastbound 12 Mile Road. Six cellular providers are planned collocate on the tower.

Traffic Study

Was a study submitted and is it acceptable?

2. No traffic study was submitted. The proposed facility would not generate enough new trips to warrant a study, based on the City's Procedures Manual.

Trip Generation

How much traffic would the proposed development generate?

3. Typically we would provide a trip generation table for the proposed land use within our traffic review, but no data is available from the Institute of Transportation Engineers (ITE) for the proposed communications tower. In our discussion with the applicant's engineer earlier this year, a facility such as the one proposed generates approximately six visits per month by a single vehicle (one monthly maintenance check by each of the approximately six providers that would collocate on the proposed tower).

Vehicular Access Locations

Do the proposed driveway locations meet City spacing standards?

4. A gated access drive is proposed on the south side of eastbound 12 Mile Road, and would follow the same general path as the existing gravel drive, which serves the MDOT construction staging area and temporary batch plant. One new curb-cut and curbed driveway is proposed on the south side of eastbound 12 Mile, approximately 110 feet (measured center-to-center) east of the southbound M-5 on-ramp. The currently proposed driveway location has been shifted further west from its previously proposed location,

presumably to avoid the potential for conflicts with the nearby gap in the median of 12 Mile Road. We do not feel that the City's commercial driveway spacing standards (DCS Section 11-216.d.1.d) apply because the proposed driveway should not be considered a commercial driveway. Given the very limited volume of traffic to be generated by the proposed facility (approximately 6 vehicles per month), the location and visibility of the proposed gate, and the proposed signage (two "Authorized Vehicles Only" signs, on either side of the driveway), we have minimal concern for the potential for traffic conflicts created by the proposed driveway.

5. Driveway is proposed to include an asphalt approach extending 25 feet south of the back of curb of 12 Mile Road, with the remainder of the driveway to be compacted aggregate.

6. Proposed utility structure driveway meets all of the Design Considerations included within Section 11.216.e of the City's Design and Construction Standards.

7. Revised plan includes a note on Page LP (Location Plan) stating that City emergency services will have access to the locked gate.

Vehicular Access Improvements

1

Will there be any improvements to the public road(s) at the proposed driveway(s)?

8. No improvements are proposed to eastbound 12 Mile Road. The proposed use is not expected to generate sufficient traffic to warrant a turn lane or taper.

9. The existing gravel drive is currently accessible from the southbound M-5 on-ramp (via a gravel service area adjacent to the east shoulder of the ramp). We previously recommended that the gravel service area be modified so that the sole point of access to the site would be via the new gated driveway on the south side of 12 Mile Road. Sheet C-2 (Site Grading Plan) provides a detail describing how this area would be cleared of aggregate and seeded. No change is proposed to the existing flat topography.

Driveway Design and Control

Are the driveways acceptably designed and signed?

10. The design standards for a Utility Structure Driveway (DCS Figure IX.6) have been met. Two "Authorized Vehicles Only" signs are proposed on either side of the new entrance, to deter motorists from mistaking it for a ramp onto M-5. Two "Turn Right Only" signs are proposed to deter authorized vehicles exiting the site from turning left into one-way traffic. The revised plan provides height and dimensions of proposed regulatory signs. Sign height has been reduced to the 5-ft rural standard, per our request.

Pedestrian Access

Are pedestrians safely and reasonably accommodated?

11. The proposed facility is not intended to accommodate pedestrians.

Circulation

ì

Can vehicles safely and conveniently maneuver through the site?

12. The applicant has provided a turnaround at the east end of the driveway. No further improvements are necessary.

Parking Requirements

Is adequate on-site parking provided?

13. Section 2505.10 of the City's Zoning Ordinance states that for uses which do not have an off-street parking requirement listed in the Ordinance, the City's traffic consultant may make a recommendation to the Planning Commission. Birchler Arroyo recommends that the single parking space proposed on the east side of the service pad be deemed adequate off-street parking for the use proposed.

Opinion of Cost

February 26, 2010

Mr. Tony Puljic, PE Terra Consulting Group, Ltd. 600 Busse Highway Park Ridge, 1L 60068

Re: Site MI 11404-S Novi, MI

Dear Tony:

Please find below my opinion of the costs that would be incurred for the landscape work at the SW 5 Mile, Site MI 11404-S in Novi, MI.

Planting (excluding site preparation)-Labor and materials(Planting mix, Plant material, Mulch & 200sy of turf repair)\$23,060.00

Please note that all pricing information is conservatively estimated based on the revised landscape plan dated February 26, 2010 and may be subject to change. The cost also reflects a 5% contingency to accommodate for inflation in labor and materials.

I hope this Opinion of Cost is helpful. Please let me know if you have any questions or comments.

Sincerely-

Kathryn Maxwell Talty, ASLA Principal K M Talty DESIGN

OFFICE MEMORANDUM

- DATE: March 11, 2009
- TO: Stacey Gough, Permit/Drainage Engineer Oakland Transportation Service Center

FROM: Mark A. Dionise, P.E. Utility Coordination & Permits Section Manager Real Estate Division

SUBJECT: Commercial Wireless Communication - Formal Application Proposed Southwest Quadrant of M-5 and 12 Mile Interchange Novi Township, Michigan - Oakland County

Please review the attached wareless communication installation request. This site was previously given preliminary approval by the Oakland Transportation Service Center (TSC) in April 17, 2008. It is important that the review include any and all region/TSC personnel who may have concerns with the location or operational characteristics of this facility.

If this formal application package is denied, please summarize the reason(s) why and provide them as an attachment to this memo-indicating so. A hard copy of the formal application package and original individual permit will follow by mail.

The permit application and complete package will be attached to the standard cell tower contract, and become part of the agreement between SBA/AAT and the State of Michigan. Therefore, it is important that any site specific construction, maintenance requirements, or other special conditions that are not covered in this application package be included as permit attachments.

The agreement between the State of Michigan and SBA/AAT communication states specific time allowances for preliminary and formal wireless communication installation reviews. In order to meet these requirements, your response is requested May 11, 2009.

If you have any questions or need additional information, please feel free to contact either me or Joe Rios. Statewide Construction Permit Coordinator at (517) 241-2103.

> In Reply Refer To: HAD-MI

Mr. Matthew W. DeLong, Administrator Real Estate Support Area (E050) Michigan Department of Transportation Lansing, Michigan 48909

Dear Mr. DeLong:

Commercial Wireless Communications Site Development Application Cell Tower Installation in Limited Access Right-of-Way M-5 at 12 Mile Road Novi, Oakland County

This is in response to your July 24, 2009, e-mail requesting FHWA approval of the subject cell tower installation. It is our understanding that the access drive location has been reviewed by MDOT's traffic and safety staffs to assure traffic conflicts are minimized between the ramp traffic and 12 Mile Road traffic. Also, it has been determined that the concerns in the FHWA May 8, 2008 letter have been addressed.

Please accept this reply as FHWA approval to proceed with the installation as per plan.

Please feel free to contact me for any additional information you may need.

Sincerely,

Ronald L. Krauss, P.E. Realty Officer and Special Programs Manager

Memorandum of License -- 30 Foot Access Easement

MDOT #2010-

EXHIBIT 3 MEMORANDUM OF LICENSE

A. The State of Michigan, by its Department of Transportation ("the State"), having an address of 7050 West Saginaw Highway, Lansing, Michigan 48909, owns certain property located at 12 Mile Road/M-5, City of Novi, County of Oakland, and State of Michigan, and known on the tax map for said ______ as ______ (the "Property").

B. By way of that certain License Agreement dated ______, the State granted to SBA Towers II LLC ("SBA"), a Florida limited liability company having an address of 5900 Broken Sound Parkway N.W., Boca Raton, Florida 33487, the right to use a certain portion of the Property (the "Licensed Site") for the construction and operation of a communications tower and equipment shelters.

C. The State and SBA have agreed that SBA may, at its option, record a Memorandum giving notice as to SBA's interest in the Licensed Site.

Now, Therefore, the State and SBA represent as follows:

1. The Licensed Site is in the location as set forth on the plan attached hereto as Attachment "A".

2. The initial term of the License is <u>20 yrs</u> years, commencing on <u>,</u> and ending on <u>,</u> . SBA may, at its option, renew the term of the License for <u>2</u> additional <u>5</u> year periods.

October 1, 2009

Ms. Stacy Gough Permit Engineer MDOT Oakland TSC 800 Vanguard Drive Pontiac, MI 48341

RE: Permit No.: 63192-0023-09-0113ME

Dear Stacey,

Please consider this SBA's agreement that once the batch plant has been removed (approx late 2010) SBA will come back in and place the field approach off of 12 Mile. We will complete all of the requirements set forth in the original issued permit (seeding, etc. to close of the existing ramp driveway, the driveway, permanent compound, landscaping, etc.) according to the Construction Drawings dated September 23, 2009.

Respectfully, oy Ĕ. Tiemeyer

Project Director

Various SBA Affidavits

February 25, 2009)

SBA Towers II, LLC. – Affidavit Application for the Construction of a Wireless Services Facility SBA site # MI11404-S SW 5 Mile Subject Location: SW corner of M-5 and Twelve Mile Road

To Whom It May Concern,

SBA Communications Corporation "SBA" is a leading independent owner and operator of wireless communications towers in the United States.

SBA provides this signed statement indicating its willingness and ability to allow collocation on the proposed tower. SBA will permit collocation and shared use of the facility subject to usual market conditions and rent.

Furthermore, SBA, its affiliates and subsidiaries hereby agree to perform and operate the facility in compliance with the following standards:

- 1.) The proposed communications tower will be designed and constructed to accommodate collocations of a minimum of five (5) wireless service providers.
- 2.) SBA will respond to all requests for information from a potential shared-use applicant in a timely manner;
- 3.) SBA will negotiate in good faith concerning future requests of shared use of the tower by other providers of communications.
- 4.) SBA agrees to operate and maintain the facility in compliance with all local, state and federal regulation and all operational requirements as mandated the FCC.
- 5.) The facility will be maintained in good order, kept free of overgrown vegetation and routinely inspected by a field engineer.

This affidavit is signed by a representative of the company authorized to commit the company.

AFFIDAVIT REGARDING MAINTENANCE AND REMOVAL OF TELECOMMUNICATIONS TOWER

SBA Towers II, LLC. – Affidavit Application for the Construction of a Wireless Services Facility SBA site # MI11404-S SW 5 Mile Subject Location: SW corner of M-5 and Twelve Mile Road

SBA Communications Corporation "SBA" is a leading independent owner and operator of wireless communications towers in the United States.

SBA HEREBY AGREES:

- 1. The proposed improvements shall be installed and maintained in compliance with the following standards:
 - a. The wireless facility will be visited and visually inspected on a monthly basis by a field technician.
 - b. SBA shall provide the City of Novi an annual inspection report issued by a licensed engineer attesting to the structural integrity of the tower.
 - c. The tower will be operated and maintained in compliance with all local, state and federal requirements including all requirements mandated by the Federal Communications Commission (FCC).
 - d. All landscaped areas of the Property shall be kept in a vigorous reasonably weed free, growing condition by regularly scheduled maintenance practices (i.e., fertilization, irrigation, and similar measures). Any lawn areas of the Property shall be maintained by regular mowing.
 - e. Drainage systems on the Property shall be maintained free of debris, mud, silt or other unsightly conditions and shall be kept fully operable as designed and built.
 - f. Trees on the Property shall be pruned and maintained according to standard horticulture practices to keep them in a neat and healthy condition. Broken, dead and unsafe branches shall be removed when said condition occurs.
 - g. Litter shall be removed from all areas on the Property on an as needed basis to keep the Property litter free.
 - h. All paved surfaces, curbs, paths, fencing, signs, lighting and other structures and surfaces on the Property shall be maintained in a complete, safe and good

condition, as they were originally designed and constructed. Needed repairs or replacements shall be made which conform to the Site Plan.

- i. The Property shall be secured from unauthorized access and the security fence and entrance gate shall be maintained and kept in repair at all times.
- j. The Property shall be maintained in compliance with all local ordinances and codes.
- k. Utility transmission lines servicing the tower facility shall be placed underground.
- 2. Cessation of operations and removal
 - a.) In the event the use of the communications facility is discontinued and operations of the facility end, SBA shall dismantle and decommission the tower within 90 days of said cessation of operations.

This affidavit is signed by a representative of the company authorized to commit the company.

September 23, 2009

SBA Towers II, LLC. – Affidavit SBA site # MI11404-S SW 5 Mile Subject Location: SW corner of M-5 and Twelve Mile Road

On Wednesday, July 29th, 2009, a discussion took place between Jason Laskey, a representative of SBA Towers II, LLC and Fernando Guevara, of ITC Holdings Corp Property Management Department.

Mr. Guevara stated the following:

<u>ITC Building</u> – The six story building located at 27175 Energy Way, Novi, MI houses the corporate offices of ITC. It is unlikely the company will allow the placement of third party antennas on the building because it is a secured limited access facility. Additionally, there are concerns that the addition of antennas could cause interference with ITC's existing corporate communications system.

<u>Transmission Line Attachments</u> – Per Mr. Guevara, ITC owns transmission tower structures which were acquired through a purchase from DTE Energy. As part of that sale, DTE retained all leasehold rights associated with transmission lines. ITC has no authority to enter into a direct agreement with third party entities.

Contact information for Fernando Guevara is as follows:

Fernando Guevara ITC Holdings Corp Property Management Department 27175 Energy Way Novi, MI 48377 (248) 946-3514 (Direct) (248) 946-3515 (Fax) E-mail: <u>fguevara@itctransco.com</u>

This affidavit is signed by a representative of the company authorized to commit the company.

Subject: RE: Southwest M5 (Novi) - DE01341

Joy, T-Mobile has tried for several years to work with DTE/ITC on getting on either one of their transmission towers in this immediate area, or to collocate on to ITC main building in this area. However, we have been unsuccessful and have been told repeatedly that the ITC building is off limits due to security reasons. The string of transmission towers has also been taken off the list of allowable transmission towers to collocate on due to ITC upgrades to that string. Please feel free to call or email with any questions. I would be happy to speak with anyone at the city of Novi regarding this as well.

Thanks, Heidi

Re: Verizon Wireless #107 – Meadowbrook & 12 Mile Our File No. JC2884-09

Dear Ms. Kitzman:

This letter is written on behalf of my client Verizon Wireless to address the immediate need for a new antenna in the northerly quadrant of the I-696/M-5/I-275 interchange area. The additional communications facility is intended to improve and maintain continuous, uninterrupted voice, location and data services to customers living, working and traveling in the area.

The proposed shared use antenna with Michigan Department of Transportation is an ideal public/private cooperative venture that minimizes impacts on homesites while providing much needed essential communications.

Existing antenna in the area include:

| Site No. | Address | Type of Structure |
|----------|--|-------------------|
| 155 | 39990 – 14 Mile Road Commerce Twp. | Monopole |

Verizon Wireless #107 - Facility Search Information

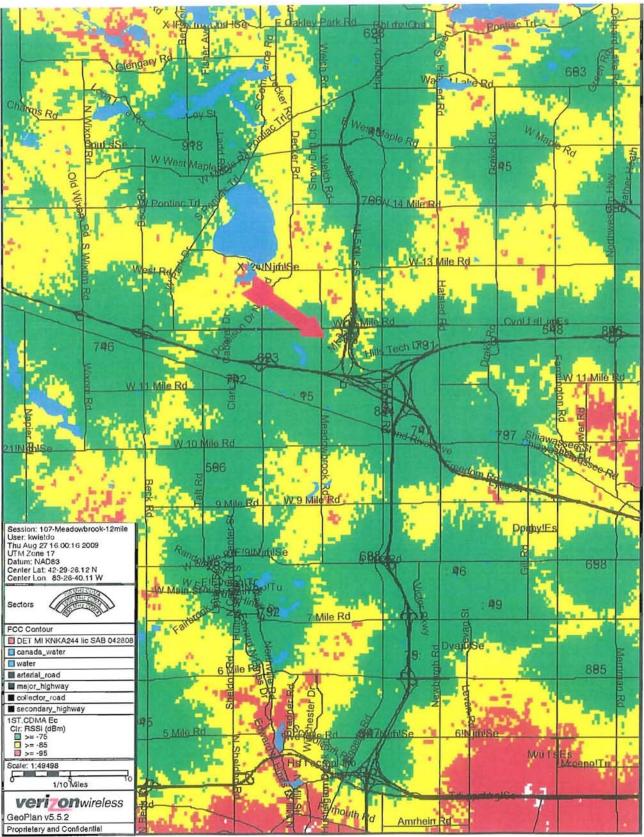

Verizon Wireless has had this site in search for approximately 4 years. Sites considered include the Michigan State Agricultural Station at 12 Mile & Meadowbrook, various lower profile offices east of the site and, of course, ITC (Edison Towers). The existing lattice power lines are not satisfactory for Verizon Wireless requirements due to loadings, maintenance, ground space and access.
