

## AGENDA

### WALLED LAKE LAKE IMPROVEMENT BOARD MEETING

November 19, 2020

10:00 AM

#### REMOTE MEETING

- I. Call Meeting to Order
- II. Roll Call
- III. Approval of Minutes of September 9, 2020 meeting
- IV. Treasurer's Report
- V. Consideration of removal of Walled Lake parcels 92-17-35-328-001 through 92-17-35-328-037 from the 2020-2024 Special Assessment Roll.
- VI. Discussion of 2020 Treatment Review & 2020 Water Quality Report
- VII. Discussion of 2021 Treatment Recommendations
- VIII. Consideration of renewal with Savin Lake Services for 2021 lake treatment services
- IX. Approval of 2021 Budget
- X. Public Comment
- XI. Other Business
- XII. Adjournment

Please visit [www.cityofnovi.org/lakeboard](http://www.cityofnovi.org/lakeboard) for additional information

**WALLED LAKE  
LAKE IMPROVEMENT BOARD  
MEETING MINUTES  
September 9, 2020**

The meeting of the Lake Improvement Board for Walled Lake was held electronically utilizing the video/audio conferencing platform Zoom. The meeting was called to order by Tina Miller, Chairperson, at 7:02 pm.

Present:

Tina Miller, Riparian Owner Representative (Chairperson)  
Megan Mikus, City of Novi Representative (Secretary-Treasurer)  
Karen Warren, Oakland County Water Resource Commissioner's Representative  
Casey Ambrose, City of Walled Lake Representative  
Gwen Markham, Oakland County Board of Commissioner's Representative

Also, Present:

Victor Cardenas, City of Novi, Assistant City Manager  
Mark Roberts, Attorney, Secrest Wardle

**Public Hearing**

Chair Miller went over the rules of order for the public hearing and opened the public hearing.

Member Mikus received 10 written comments and read them into the record:

*Comments submitted in writing:*

Mark Rubinstein – 1316 East Lake Drive  
Submitted - 8/29/2020 12:51:57 PM

My comments are shared by many of my neighbors. Who has the right of use with water crafts on walled lake?? There are too many boats on the lake owned by people not living on the lake or have deed rights to the lake. We all would like this stopped and by increasing money spent on property owned by the city by increasing our taxes is not correct. The lake is already over populated with people and boats and we want to know if anything can be done about that. If anyone can use the lake then increase the taxes to everyone who can use the lake not just the people who live on the lake who are being negatively impacted by the improvement of property that isn't private.

Gerald L Anderson - 127 S. Pontiac Trail, Walled Lake, MI 49390  
Submitted - 9/2/2020 11:07:25 AM

This letter is to confirm my past and future support of the efforts by the Walled Lake Improvement Board and the extension of the special assessment roll from 2021 through 2025. The ability of the cities of Walled Lake and Novi to come together and identify the issues of invasive weeds in Walled lake and act in a coordinated effort to solve the problem has been a success. Being a lakefront owner for 42 years, I have seen the changes before and after the milfoil and other invasive weeds were introduced to the lake. 11 years ago the lake was basically dead, with beach closing from Ecoli, to weeds so thick boating and swimming were restricted to a small area of the lake. Each

**WALLED LAKE  
LAKE IMPROVEMENT BOARD  
MEETING MINUTES  
September 9, 2020**

Monday Walled Lake would send a front end loader to collect the large amount of weeds pulled from the lake. Today we have healthier lake for all to use. However great care must be taken to keep the gains we have made and continue our vigilance against the spread of Milfoil currently in the lake and other invasive species such as Curly Leaf and Starry Wart that we also treat for. We will never be able to completely control these weeds, at best we have the tools to contain them. To the members of city council for their support, and the tremendous amount of time and effort by the volunteers on the lake board, I offer my thanks

Allan McPhee - 913 E Walled Lake Dr.

Submitted - 9/8/2020 9:32:05 AM

I would rather see a usage based assessment. Everyone who has a boat on the lake would have to buy a annual pass (sticker) and have it place on their boat. Example, annual pass is \$125 and temporary one day passes \$50. Violators will be fined \$100 per occurrence. The cost could be adjusted to cover additional admin expenses incurred by the cities

Adam Virga - 142 Arvida Street, Walled Lake MI

Submitted - 9/8/2020 3:13:55 PM

The management of aquatic weeds needs to be executed in a more comprehensive manner. Currently the dead weeds are allowed to pile up along the lakeshore creating rotting masses of decaying vegetation. This is not sanitary nor healthy for the lake, wildlife, or the residents using the lake. It has been left up to a few individuals to cleanup the created mess with their own personal resources. The management plan needs to include removal of the poisoned weeds from the lake. I am not in agreement to pay additional taxes to create more of a mess. There needs to be a look at mechanical removal in lieu of poison, or mechanical removal of the poisoned weeds. And no it is not true that the boat traffic uproots the weeds. Thank You for your consideration.

Matt Matteson – 1679 Harbor Cv, Novi, MI 48377

Submitted - 9/8/2020 8:43:04 PM

On behalf of the board of directors at Harbor Cove Condominiums, the units located at 1677, 1679, and 1681 Harbor Cove should not be assessed at a rate of 0.75, as historically assessed, as they do not fit the description of "Waterfront condominium properties". They would fall under "Condominium parcels with lake access", and should be assessed at 0.1 unit of benefit as they fully fit the later description and do not fit their assessed description. Each of the three parcels is landlocked and does not have lakefront property. It is recommended that the proposed units of benefit is revised for these three parcels.

Adam Bell - 1309 East Lake, Novi, MI 48377

Submitted - 9/9/2020 12:49:40 PM

Why are the beaches/parks in either city not included as part of the Assessment District? Mercer Beach has roughly 275' of lakefront. Pavilion Shore Park has

**WALLED LAKE  
LAKE IMPROVEMENT BOARD  
MEETING MINUTES  
September 9, 2020**

approximately 900' of Lakefront. Lakeshore Park has about 650' of Lakefront. The City of Novi also owns several parcels that are both Lakefront and Backlots, which neither are assessed. The State of Michigan owns a parcel that is in the Southeast corner of the lake that is not being assessed. Will you please explain why government owned land is exempt from the assessment?

Gary Zack - 359 South Lake Drive

Submitted - 9/9/2020 4:48:33 PM

I support the confirmation of the assessment role and the continuing treatment of Walled Lake for invasive species. The weeds have been worse this year than most other years. We have large amounts of weeds washing up on our shoreline (several lawn bags a week) and have had boat rudders and propellers fouled by weeds many times. I cannot imagine what it would be like without treatment and hope we can achieve better control next year. Gary Zack

Colleen Bouren – 1391 East Lake Drive

Submitted - 9/9/2020 6:01:19 PM

I do not want chemicals put into the lake. I have two small children and too often chemicals are deemed safe and then years later they are found to be toxic or cancer causing, especially to children. I find it amazing that my kids can swim in the lake the day after it is treated but my dog cannot drink from it for a week. It is an inland lake, not a pool, and therefore is supposed to have seaweed and other aquatic vegetation. I would support paying more for cutting and harvesting the vegetation.

Marilyn Boylan - 761 Walled Lake

Submitted - 9/9/2020 6:22:25 PM

After visiting Green Lake which has no weed problem it was disappointing to come back to Walled Lake. I realize the source is a little different but 10 years ago this was a beautiful lake. I feel both cities have not set rules and followed through with any they have made. For example stickers for Walled Lake boats and lot owners can have one summer guest. Novi lets any boat come in at Endwell. If boats were not moving from lake to lake we wouldn't be concerned about chemicals and money.

Jen Boylan - 919 Bluffton

Submitted - 9/9/2020 6:30:28 PM

I would like to say that the lake bottom and weeds elms worse than when this started. Also can we control the amount of pesticides put on the lawns and the salt put on the roads. We are only putting a bandaid on this problem. Can we look into more natural ways. I know when this first came up there were some more natural ways. Thanks.

Comments made in-person

Holly Romaya- 42800 W 14 Mile Rd., Walled Lake 48390

Me and my husband, we understand and are aware of the concerns of the lake and agree with the residents. And we are ok with paying more in taxes and fees to resolve the issues with the lake. Our only issue is that we have tried to get keys to a dock, and

**WALLED LAKE  
LAKE IMPROVEMENT BOARD  
MEETING MINUTES  
September 9, 2020**

are unsuccessful and we were told nobody knows how to get keys.

John Duneske – 357 S Lake Dr

I pretty much agree with all the comments that have been made. The weeds were a little heavy this year on the lake than they have been in previous years. I don't know what happened with the control but something needs to be done with Savin in that respect. The only other question that I have I am very much in favor in paying the assessments we have, but based on what we were charged this year, looks like up to my lot up to that 95 feet, we are being charged \$196.34 and previously \$133.15, which is an increase of \$63 or about 48% year. Can you justify the increase of the assessments? Thank you.

*Public Hearing closed.*

**Consideration of Resolution Confirming the Assessment Roll**

**Move Markham, Supported Mikus: To approve the assessment roll and approve the resolution as submitted.**

Chair Miller opened for discussion on the motion and the points brought up during public hearing.

Attorney Roberts: I don't know if either assessor is available but there was a comment received about 3 parcels in the Harbor Cove condominium complex claiming that they were improperly assessed and it sounds to me there was a comment about keys to a dock from Ms. Romaya. I don't feel that keys to a dock would fall within the Lake Board jurisdiction. That is not something that the Lake board would administer. I don't believe we could address that issue for her.

Chair Miller: For Matteson, written comment #5, they brought up that the parcels do not fulfill the description of them being waterfront condos. We could have the assessor look at that and then lead was already existing on the previous year, but may have comment on how that came to be.

Attorney Roberts: The Board has three options- reject the assessment roll altogether, send the roll back to the Assessors with specific comments, or accept the roll as submitted.

Member Mikus noted based on the previous and current assessment roll, the units of benefit did not change for these properties, and that the other properties in that condominium plan are all assessed at the same units of benefit. No action was taken.

Member Markham asked the Attorney to weigh in on the question about why the government-owned land is exempt from the assessment of the park lands and such.

Attorney Roberts: It is by statute. Any affected local governments are exempt from that

**WALLED LAKE  
LAKE IMPROVEMENT BOARD  
MEETING MINUTES  
September 9, 2020**

because obviously the government doesn't have any money, it uses taxpayer money anyway, so they're exempted..

Member Markham: I would also like to address the question about lake access. This is a public lake anyone can use it. I agree that the boat launch down on Endwell is less than adequate. But that's what is there and anyone can use it. In fact, the Oakland County sheriffs use that little driveway to launch the sheriff's boat when they come to the lake. It is a public lake.

Member Mikus: Did you want to address the comment about the increase in the assessment?

Chair Miller: We had spoken to the lake services and the cost that will be increasing and we tried to come to an agreement about can we get an estimate for 5 year rather than see increase every year that might be unexpected. So we looked at the cost and we also had discussion about different approaches. There was interest in a less chemical approach and I think we ruled out harvesting. But there was more discussion about how to address it with less chemicals to maintain good integrity of the water quality as well as enjoyment of the lake. The cost of product services will be increasing.

Member Casey: If we go over the history of this assessment, I believe we started with a higher amount for the first five years and then found that we were able to manage the lake and our estimate going into the second five years was less because we didn't think we were going to need as much and then we ran into this situation to where we had to treat the lake more often. The cost of the chemicals went up. So this was just an adjustment for the next 5 years to prepare what it could possibly be. Maybe the Treasurer could give us a better report on those numbers, but that is what my memory recall.

Member Mikus agreed with Member Casey's comments.

**Motion to accept the resolution and the assessment roll as presented.**

**Miller – yes**

**Ambrose – yes**

**Markham- yes**

**Warren – yes**

**Mikus –yes**

**Motion carried 5-0**

**Approval of Minutes of July 14, 2020 Meeting**

**Moved by Mikus, Supported by Ambrose, Miller, Markham, and Warren**

**CARRIED 5-0: To approval of minutes from July 14, 2020 meeting.**

**Treasurer's Report**

**WALLED LAKE  
LAKE IMPROVEMENT BOARD  
MEETING MINUTES  
September 9, 2020**

**Moved Mikus; Supported Miller**

**CARRIED 5-0: To accept the Treasurer's report.**

**Certification of delinquent assessment reports from Walled Lake and Novi**

Member Mikus: For the City of Walled Lake, they paid the full assessment amount on May 28. Therefore, there were no delinquent assessments to report. For the City of Novi, there was a total of 25 parcels that were delinquent so once you add the interest accrued from February to September 1, you have interest of \$117.37 and the delinquent assessment of \$1955.72.

**Moved by Mikus, Supported by Markham**

**CARRIED 5-0: To accept the certification of delinquent assessments.**

**Treatment Update**

Chair Miller: I have been in contact with Savin Lake Services. Since our last meeting, I have spoken with them three times in August and again in September. We find that we may be slightly short on treating the fall acreage. There have been inquiries on how to treat the lake with less chemicals, and we are trying to find out what would be the most effective and cost efficient. It is still under investigation, and I will present more once I have more information. The most recent treatment was August 31 and then another treatment is scheduled in September, which is when a fall survey will be completed. Chair Miller went on the lake where proposed treatment is planned for September and confirmed there are weeds, which could be hybrid/ Eurasian Milfoil. A fall treatment is necessary because Eurasian Milfoil can survive under the ice. Some of the weeds Chair Miller pulled up showed evidence that starry stonewort is dying back in the areas that we treated in late August.

Member Markham: Asking about the commenter who asked about weeds being harvested and ending up in their front yards. Is there a process as to how those are to be collected? Are they dropped back into the lake or are the homeowners expected to pull them out and put them away with yard waste?

Member Ambrose: This was the first time in probably 10 years that we have had an issue with the weeds. He believes it is because of the fluctuation in temperatures and the low lake level due to the lake of rain. This year Walled Lake did a special pickup while the beach was closed.

Chair Miller: On the Novi side, she does have weeds as well that she pulls out, lets them dry out, and puts out with lawn waste. It should be assumed that is just part of the maintenance of your yard. But it was really nice that Walled Lake did that.

Chair Miller noted that the weeds are not from the dieback by the treatment. The Eurasian watermilfoil does have a fragmentation period where they drop off and that's the way it spreads its seeds. And there is an awful lot of boat traffic, I think that does it. Even pulling up anchors can distribute weeds. Harvesters on the other hand would

**WALLED LAKE  
LAKE IMPROVEMENT BOARD  
MEETING MINUTES  
September 9, 2020**

cause an awful lot of fragmentation, and then, the milfoil would be carried to other areas and just start growing again.

Member Markham noted she was at Pavilion Shore Park recently with the Oakland County Water Resource Commissioner and he said that Walled lake is really clear compared to other Oakland County lakes. He felt that the lake was really in good shape.

**Consideration of the budget amendment for additional treatment.**

Chair Miller thinks we are going to be in need of a little bit more than the 24 acres that was projected. She is asking for an amendment in the budget of an additional 10 acres of coverage, which would take it from the planned 24 acre treatment to a 34 acre treatment. The cost of treating per acre is \$665.08. That would bring the budget amendment that I'm presenting to \$6650.

**Moved Ambrose, Supported Markham**

**Miller – yes**

**Ambrose – yes**

**Markham- yes**

**Warren – yes**

**Mikus –yes**

**Carried 5-0: To approve a budget amendment for treatment for \$6650.**

**Public Comment**

No comments were made.

**Public comment ended.**

**Other Business**

Chair Miller has been in contact with Midwest Glacial Lakes grant program. There were several topics that she might explore, such as improving fishing, spawning habitat, runoff lawn fertilizers and the street salts, added enzymes to promote the decomposition that reduce the organic sediment in the lake. Those are several categories that I am looking at

**ADJOURNMENT:** There being was no further business to come before the Lake Improvement Board; the meeting was adjourned at 7:54 PM.

**Subject:** RE: Walled Lake Improvement Board SAD Roll Novi/Walled Lake 2020-2024  
**Attachments:** 2020 LAKE BOARD ROLL as REVISED\_50-92.xlsx

In response to your request, you will find attached a copy of the 2020 Lake Board Roll as “REVISED” to exclude the thirty-seven (37) parcels in the City of Walled Lake portion of the roll identified by the Parcel Nos. 92-17-35-328-001 through 92-17-35-328-037. These parcels now subject to the 2019 City of Walled Lake Planned Unit Development (PUD) Agreement related to the Beachwood Subdivision, recorded in Liber 53583, Pages 787-900 of Oakland County records, have surrendered the riparian and/or lake access rights once associated with their “Parent” Parcels. The removal of these parcels from the 2020 Lake Board Roll reduces the City of Walled Lake parcel count from 793 to 756 and their unit count from 194.10 to 190.50 with the roll total unit count now at 501.65.

If you require my further involvement in preparing for the presentation of this roll to the Lake Board, please feel free to contact me again.

**Subject:** Walled Lake Improvement Board SAD Roll Novi/Walled Lake 2020-2024

**RE: Parcel Nos. 92-17-35-328-001 through 92-17-35-328-037**

As per our discussion earlier this week, in response to an inquiry of Sandra Barlass, City of Walled Lake Finance Director, we have reviewed the inclusion of the thirty-seven (37) parcels identified above in the **Walled Lake Improvement Board Novi/Walled Lake SAD Roll 2020-2024 approved September 9, 2020** she found to have been included in error. We have affirmed that although the "Parent" Parcels of these parcels held riparian and/or lake access rights and were included in the two (2) prior rolls those rights were surrendered when the property was included in the 2019 City of Walled Lake Planned Unit Development (PUD) Agreement related to the Beachwood Subdivision, recorded Liber 53583, Pages 787-900 (See Liber 53583, Page 889 – Point "d.") in the Attached Document) as combined with the Master Deed Beachwood Oakland County Condominium Plan No. 2284. It is my understanding, after discussing this discovery with you, that the parcels representing a combined 3.60 units (Parcel 92-17-35-328-037 representing a General Common Element Parcel is on the roll without a Unit of Benefit assigned it) once removed from the roll will result in an **annual revenue loss of \$706.68 or a total loss of \$3,533.40 over the five (5) year term** which loss could be absorbed via the contingency established for this roll thereby avoiding the need for an accompanying Deficiency Roll. Further, as a result of this discovery I have re-visited the Split/Combination Activity that has otherwise occurred since the last roll to find this discovery is the extent of any mis-matches. In an effort to prevent a recurrence of this situation in subsequent rolls we have determined that when reviewing the Parcel Nos. involved in Split/Combination Activity we must not limit our review to tracking the Parcel Nos. to ascertain the "Parent" to "Child(ren)" Parcels haven't the relationship to the roll compromised we must also review the Legal Descriptions. **Finally, because this roll and the related district have been approved by the Walled Lake Improvement Board we request they be called upon to delete the thirty-seven (37) parcels from both the district (you have indicated was approved by Resolution No. 2 at P.O.B. circa 2010) and the SAD Roll 2020-2024 as soon as possible so that the Walled Lake Treasurer's Office can advance with the commitment of their December 2020 Tax Roll and related collections.**

If you have any questions, or require my further involvement in your review of this matter, please feel free to contact me.

## **Walled Lake 2020 Water Quality Report**

### **Summary:**

Water Quality Testing was completed 2 times on Walled Lake in 2020 at 3 different locations around the lake. Of the parameters tested, Temperature, Dissolved Oxygen, Secchi Disk, and pH were sampled while on the lake. Chlorophyll  $\alpha$ , Nitrate-N, Phosphorus, Alkalinity, and Conductivity were sampled by sending the water in sample bottles to an independent laboratory, White Water Associates located in Amasa, MI, where the analysis was ran.

A well known limnologist named Wally Fusilier developed a grading scale for various parameters of water quality. Data collected in 2020 is shown below and given a grade based on Fusilier's scale. Additionally, historical data and parameter descriptions are provided at the end of this report.

Because herbicide treatment of aquatic vegetation has occurred on Walled Lake, it should be noted that the application of herbicide has no direct impact to the water quality of Walled Lake.

Overall in 2020 based on the analysis results, Walled Lake's water quality remained consistent with years past. In both the spring and the fall Walled Lake had an average grade B for all 3 sites with the exception of fall site 1 being an A. All of the values are constant with years past. Fall conductivity in site 1 was a lot lower than ever seen in the lake before. This may be because of human or instrumentation error and also led to why the site received an A.

*(Walled Lake Sampling Sites)*

## 2020 Results:

## **Parameter Descriptions:**

### **TEMPERATURE AND DISSOLVED OXYGEN**

Temperature exerts a wide variety of influences on most lakes, such as the separation of layers of water (stratification), solubility of gases, and biological activity.

Dissolved oxygen is the parameter most often selected by lake water quality scientists as being important. Besides providing oxygen for aquatic organisms in natural lakes, dissolved oxygen is involved in phenomena such as phosphorus precipitation to, and release from, the lake bottom sediments and decomposition of organic material in the lake.

Low dissolved oxygen concentrations (below 4 milligrams per liter) are generally insufficient to support fish life. In most Michigan lakes, there is no dissolved oxygen below the thermocline in late summer. Some experts like to see some dissolved oxygen in the bottom water of a lake, even if it is almost zero. This is because as long as there is some dissolved oxygen in the water at the bottom of the lake, phosphorus precipitated by iron to the bottom sediments will remain there. Once a lake runs out of dissolved oxygen in the water at the bottom iron comes back into solution. When that happens, it releases the phosphorus back into the water. This can cause additional algae to grow when the lake mixes.

### **DISSOLVED OXYGEN, PERCENT SATURATION**

Because the amount of dissolved oxygen a water can hold is temperature dependent with cold water holding more than warm water, dissolved oxygen saturation is often a better way to determine if oxygen supplies are adequate. The best is between 90 and 110 percent.

### **CHLOROPHYLL $\alpha$**

Chlorophyll  $\alpha$  is used by lake scientists as a measure of the biological productivity of the water. Generally, the lower the chlorophyll  $\alpha$ , the better. High concentrations of chlorophyll  $\alpha$  are indicative of an algal bloom in the lake, an indication of poor lake water quality. The highest surface chlorophyll  $\alpha$  concentration found by Wallace Fusilier (Water Quality Investigators, WQI) in a Michigan lake was 216 micrograms per liter. Best is below one microgram per liter.

## **SECCHI DISK TRANSPARENCY (originally Secchi's disk)**

In 1865, Angelo Secchi, the Pope's astronomer in Rome, Italy devised a 20-centimeter (8 inch) white disk for studying the transparency of the water in the Mediterranean Sea. Later an American limnologist (lake scientist) named Whipple divided the disk into black and white quadrants which many are familiar with today.

The Secchi disk transparency is a lake test widely used and accepted by limnologists. The experts generally felt the greater the Secchi disk depth, the better quality the water. However, one Canadian scientist pointed out acid lakes have very deep Secchi disk readings. (Would you consider a very clear lake a good quality lake, even if it had no fish in it? It would be almost like a swimming pool.) Most lakes in southeast Michigan have Secchi disk transparencies of less than ten feet. On the other hand, Elizabeth Lake in Oakland County had 34 foot Secchi disk readings in summer 1996, evidently caused by a zebra mussel invasion a couple of years earlier.

Most limnology texts recommend the following: to take a Secchi disk transparency reading, lower the disk into the water on the shaded side of an anchored boat to a point where it disappears. Then raise it to a point where it's visible. The average of these two readings is the Secchi disk transparency depth.

Secchi disk measurements should be taken between 10 AM and 4 PM. Rough water will give slightly shallower readings than smooth water. Sunny days will give slightly deeper readings than cloudy days. However, roughness influences the visibility of the disk more than sunny or cloudy days.

## **TOTAL PHOSPHORUS**

Although there are several forms of phosphorus found in lakes, the experts selected total phosphorus as being most important. This is probably because all forms of phosphorus can be converted to the other forms. Currently, most lake scientists feel phosphorus, which is measured in parts per billion (1 part per billion is one second in 31 years) or micrograms per liter (ug/L), is the one nutrient which might be controlled. If its addition to lake water could be limited, the lake

might not become covered with the algal communities so often found in eutrophic lakes.

Based on WQI's studies of many Michigan inland lakes, they've found many lakes were phosphorus limited in spring (so don't add phosphorus) and nitrate limited in summer (so don't add nitrogen).

10 parts per billion is considered a low concentration of phosphorus in a lake and 50 parts per billion is considered a high value in a lake by many limnologists.

### **NITRATE NITROGEN**

Nitrate, also measured in the parts per billion range, has traditionally been considered by lake scientists to be a limiting nutrient. The experts felt any concentration below 200 parts per billion was excellent in terms of lake water quality. The highest value found by Fusilier was 48,000 parts per billion in an Ottawa County river which flowed into Lake Macatawa in Holland, Michigan

On the other hand, WQI has studied hundreds of Michigan inland lakes, and many times they find them nitrate limited (very low nitrate nitrogen concentrations), especially in summer.

WQI was finding many lakes have lower nitrate nitrogen concentrations in summer than in spring. This is probably due to two factors. First, plants and algae growing in lakes as water warms can remove nitrates from the water column. And second, bacterial denitrification (where nitrates are converted to nitrogen gas by bacteria) also occurs at a much faster rate in summer when the water is warmer.

Generally limnologists feel optimal nitrate nitrogen concentrations (which encourage maximum plant and algal growth) are about 10-20 times higher than phosphorus concentrations. The reason more nitrogen than phosphorus is needed is because nitrogen is one of the chemicals used in the production of plant proteins, while phosphorus is used in the transfer of energy, but is not used to create plant material. If the nitrate concentration is less than 10-20 times the phosphorus concentration, the lake is considered nitrogen limited. If the nitrate concentration is higher than 10-20 times the phosphorus concentration, the lake is considered phosphorus limited.

## **TOTAL ALKALINITY**

Alkalinity is a measure of the ability of the water to absorb acids (or bases) without changing the hydrogen ion concentration (pH). It is, in effect, a chemical sponge. In most Michigan lakes, alkalinity is due to the presence of carbonates and bicarbonates which were introduced into the lake from ground water or streams which flow into the lake. In lower Michigan, acidification of most lakes should not be a problem because of the high alkalinity concentrations.

## **HYDROGEN ION CONCENTRATION (pH)**

pH has traditionally been a measure of water quality. Today it is an excellent indicator of the effects of acid rain on lakes. About 99% of the rain events in southeastern Michigan are below a pH of 5.6 and are thus considered acid. However, there seems to be no lakes in southern Michigan which are being affected by acid rain. Most lakes have pH values between 7.5 and 9.0.

## **SPECIFIC CONDUCTIVITY**

Conductivity, measured with a meter, detects the capacity of a water to conduct an electric current. More importantly however, it measures the amount of materials dissolved in the water, since only dissolved materials will permit an electric current to flow. Theoretically, pure water will not conduct an electric current. It is the perception of the experts that poor quality water has more dissolved materials than does good quality water

3088 Hottis Rd. Hale, MI 48739    Hale: 989.728.2200    Clare: 989.386.0600    Fax: 989.516.5900

November 12, 2020

Walled Lake Improvement Board and Property Owners,

It has been a pleasure managing Walled Lake this year. Every year seems to bring a unique set of challenges and we welcome the opportunity to meet these challenges every single year. We hope that you continue to feel that your lake was managed professionally, economically, and effectively.

With so many negative things going on in the world today. I am happy to report that things went well on Walled Lake this year. We continue to see overall improvement in the ecology of the lake year after year. It has really been a great pleasure being involved, watching the transformations, and knowing the progress that has been made over the years. I have prepared a brief summary, descriptive timeline of services rendered, and all the treatment maps from this year and attached them to this document.

Please keep in mind that we are a fully integrated lakes management company offering solutions including but not limited to mechanical harvesting, herbicide control, dredging, bio-augmentation, and aeration. Savin Lake Services also offers a complete range of water quality testing, depth contour mapping, individual property solutions, and even aquatic plant density reporting.

We look forward to continuing as the Lakes Management service provider for Walled Lake again next year. We are hopeful for another great year and an even healthier diversity of native plants to outcompete the invasive plant communities. Until then; if you have any questions, comments, or require additional information, feel free to contact us.

Sincerely,

Paul Barber - Operations Manager

*Savin Lake Services Inc.*

## Summary:

This year, we saw a phenomenal decrease in the amount of Curly Leaf Pondweed present this Spring compared to previous years. Early season treatments have been very successful and by doing these treatments we are able to treat the Curly Leaf Pondweeds before they produce their reproductive turions. However, I believe part of the for the significant decrease we seen this year was also due to the Eurasian/Hybrid Watermilfoil making a vast resurgence early, which outcompeted the Curly Leaf Pondweed not allowing it to grow.

Spring treatments with contact herbicides successfully controlled the Milfoil and Curly Leaf Pondweed and allowed the natives to outcompete and prevent Milfoil regrowth in most areas. Which resulted in less areas and acreage that needed to be treated in the Fall. We continue to decrease acreages of Milfoil and see improvements in the native plant diversity plant each year.

Starry Stonewort is still present in the lake but appeared later in the season than normal. Currently, early detection followed by frequent treatments with herbicides/algaecides is the best way to keep Starry Stonewort under control. Vast amounts of research efforts are currently being done right now to create a better management solution to combat Starry Stonewort. Until a better solution is found, we will continue as we have been and do our best to contain it.

We plan to approach next year with a very similar management strategy as we have in the past. We will be monitoring the lake regularly, aggressively managing the invasive plants throughout the entire lake, and manage nuisance natives in near shore developed areas. We will continue to monitor the native plants offshore and implement vegetation harvesting if they reach the nuisance level threshold. Currently there hasn't been a need for harvesting but there may possibly be in the future. Depending on the amount of Milfoil present during next year's spring survey, we may possibly complete systemic Milfoil treatments in the Spring and then again in the fall if necessary. We feel this plan is the most effective and efficient way to keep Walled Lake clean and desirable for use by the Walled Lake residents.

### Timeline of Services Rendered:

May 11th, 2020

- Spring Water quality data collected
  - Water quality monitoring program collects data and monitors 9 different parameters relating to water quality at 3 sites on the lake in both the Spring and Fall each year
    - Parameters monitored are Conductivity, Total Dissolved Solids, Alkalinity, Phosphorus, Chlorophyll A, Secchi Disk, Temperature, Dissolved Oxygen, and pH.
- Spring Visual Survey
  - We traversed the lake in its entirety for vegetation.
  - There was still a lot of tanning in the water at this time and vegetation could not be seen visually in the areas deeper than 5 ft. but could be seen on our Sonar Equipment
  - Vegetation was present at the drop off around most of the lake. Most of the vegetation seen on Sonar equipment showed the weed growth ranged from 2- 5 ft. from the bottom of the lake.
  - Rake tosses confirmed vegetation growing was Curly Leaf Pondweed and Eurasian/Hybrid Milfoil
  - Spring Alga Blooms were present in many areas of the lake in small masses floating around below the water surface and laying on the lake bottom some shallow areas of the lake.
  - Based on survey results, water temperature, and slow weed growth treatment was scheduled for the first week in June.

June 3rd, 2020

- Initial treatment
  - 100 acres treated for Curly Leaf Pondweed and Eurasian Watermilfoil utilizing Diquat Dibromide and Chelated Copper.
  - All areas containing Curly Leaf Pondweed and Eurasian Watermilfoil were not treated during the June 3rd treatment.
    - Acreages requiring treatment were larger than we anticipated
    - Pre-approved acreages in 2020 recommendations were exhausted and we wanted to seek approval before treating the rest
- Observations during treatment
  - No presence of Starry Stonewort was found
  - Water Clarity was the best I have ever seen it on the lake for this time of year. Which was a vast improvement when compared to Clarity during Survey.
    - Allowed us to visually see the vegetation growing in the water
    - Allowed Sunlight penetration in deeper water resulting in weed growth in depths up to 19 ft.
      - Milfoil and Curly Leaf Pondweed was present in deeper water areas that showed no growth during Spring Survey
  - Vegetation was 1-3 ft. below the surface in most areas

Preserving Our Lakes Today for Our Generations Tomorrow  
[www.LakeAndPond.com](http://www.LakeAndPond.com)

3088 Hottis Rd. Hale, MI 48739    Hale: 989.728.2200    Clare: 989.386.0600    Fax: 989.516.5900

- Vast resurgence of Eurasian/Hybrid Milfoil this year.
  - Many areas of lake contained extremely dense Milfoil beds including areas treated systemically in 2018.
  - The Milfoil in the lake may have developed herbicide tolerance/resistance to 2,4-D
    - Treatments have resulted in the Milfoil treated dying and not returning that season and we see reduction the following year. However, 2 seasons after the treatment it seems to return in the same areas requiring treatment again.
    - Other Systemic Herbicide options for Milfoil are available and could potentially provide better control for longer periods of time.
    - Before continuing with additional 2,4-D applications I think we should discuss and evaluate other systemic herbicide options because we are no longer achieving the same results as we did when we first began treating the lake

June 22nd, 2020

- Second Treatment
  - We returned to lake to treat remaining areas containing Milfoil and Curly Leaf Pondweed that didn't get treated during initial application
    - 50 acres of the lake was treated with same herbicide/algaecide as initial treatment
    - All remaining areas of the lake containing Milfoil and Curly Leaf Pondweed were treated
- Observations during treatment
  - Initial treatment was very successful
  - Still no Starry Stonewort presence found this year

July 17<sup>th</sup>, 2020

- Mid-Summer Survey
  - Weather conditions were perfect for surveying
  - The first two treatments for Eurasian Water Milfoil and Curly Leaf were very effectively
    - Treated areas contained no Curly Leaf Pondweed
    - Native weeds were present to outcompete the Milfoil and prevent regrowth
      - Approximately 15% of treated areas contained new growth of Milfoil
      - Increase in Native plants species and diversity
      - Wild Celery (Eel Grass) could be found in most areas and was successfully outcompeting the Milfoil
  - Starry Stonewort was present on the North and West side of the lake
    - You could find most of the Starry Stonewort at the drop off and was well below the water's surface
    - New locations contained Starry Stonewort, but it seems to be staying isolated to the same portions of the lake

Preserving Our Lakes Today for Our Generations Tomorrow  
[www.LakeAndPond.com](http://www.LakeAndPond.com)

3088 Hottis Rd. Hale, MI 48739   Hale: 989.728.2200   Clare: 989.386.0600   Fax: 989.516.5900  
July 22<sup>nd</sup>, 2020

- Third Treatment
  - Treatment for Starry Stonewort, Milfoil, and nuisance natives near shore
    - 20 acres was treated for Starry Stonewort
    - 27.5 acres was treated Eurasian Watermilfoil and nuisance natives

August 31<sup>st</sup>, 2020

- Forth Treatment
  - Returned for second Starry Stonewort treatment and nuisance natives near shore
    - 20 acres of Starry Stonewort treated
    - 17.5 acres of nuisance natives

September 18, 2020

- Fall Survey
  - Weather conditions were ideal for the survey
    - Partly cloudy and slight wind speed
  - Water Clarity was good
    - Clear visibility of weeds
  - Water temperature was 67 degrees at the surface
  - Native vegetation began naturally senescing
    - Pondweeds and Wild Celery seen laying on lake bottom or laying over getting ready to drop
  - Invasive plants were present
    - Starry Stonewort was collapsed, and no additional treatment was needed for the season
    - Hybrid/Eurasian Watermilfoil was present
      - Approximately 45 – 50 acres of the lake contained Hybrid/Eurasian Watermilfoil
        - 30 acres needed immediate attention
        - Fall systemic Milfoil treatment was scheduled
      - Only 2 areas contained vast densities of Milfoil that were bigger than 5 acres other the rest of the were smaller patches and sporadic
      - Milfoil was in a very active growth cycle

September 22, 2020

- Fall water quality data collected
  - Samples were taken and data collected at the same 3 sites as we did in the spring

September 24, 2020

- Fall systemic Milfoil treatment
  - 34 acres treated
    - Worst areas were treated in their entirety
    - Some Sporadic areas did not get treated
      - Approved budget did not allow for all Milfoil within lake to be treated
      - Areas that weren't treated posed no immediate imminent threat

# WALLED LAKE

## Management Proposal 2021

Prepared for:  
The Walled Lake Improvement Board

3088 Hottis Road Hale, MI 48739  
989-728-2200  
[www.lakeandpond.com](http://www.lakeandpond.com)

3088 Hottis Rd. Hale, MI 48739    Hale: 989.728.2200    Clare: 989.386.0600    Fax: 989.516.5900

November 12, 2020

Walled Lake Improvement Board  
Attn: Ms. Megan Mikkus & Ms. Tina Miller  
26300 Lee BeGole Drive  
Novi, MI 48375

Subject: 2021 Walled Lake Aquatic Weed Control Proposal

Savin Lake Services Inc. has a sincere interest in remaining the aquatic nuisance weed control partner for Walled Lake. Savin Lake Services is a fully integrated lakes management company offering multiple aquatic nuisance plant control methods. Savin Lakes Services Inc. provides mechanical plant removal (harvesting), aquatic herbicide control, and biological control options for our customers. We also provide lake consulting services, whole lake aeration systems, lake dredging, and decorative fountains. Savin Lake Services Inc. has been servicing Michigan's lakes and ponds for over (25) years. We currently provide our services on over (80) lakes & (225) ponds in Michigan. The lakes that we currently have under contract range in size from 10 acres to 2,500 acres.

Savin Lake Services is an A+ Accredited Member of the Better Business Bureau of Michigan. We are also members of the Michigan Lakes & Streams Association, the Midwest Aquatic Plant Management Society, the Michigan Aquatic Managers Association, and the Aquatic Ecosystem Restoration Foundation.

We are pleased to offer the following proposal for your consideration. If you have any questions regarding the following proposal – please always feel free to contact us with any questions at any time.

Sincerely,

Guy B. Savin – President Savin Lake Services Inc.

3088 Hottis Rd. Hale, MI 48739    Hale: 989.728.2200    Clare: 989.386.0600    Fax: 989.516.5900

### CORPORATE BACKGROUND:

Savin Lake Services has been managing lakes and ponds in Michigan since 1995. The business was originally started as Rustin Lake & Pond Service by Dennis Rustin and was based in the Clare, Michigan area. Guy Savin purchased the company in 2004 and moved the main office location to Hale, Michigan. The business has grown over twenty (20) times the original size in the past 15 years. Savin Lake Services mission statement is simple. We truly believe that we are “Preserving our Lakes Today, for Our Generations Tomorrow”.

Savin Lake Services main office location is based in Hale, Michigan, and our work is located all over Michigan. Although we have only a single main office location – Savin Lake Services has been successful in managing lakes all over Michigan very well. We disperse our lakes management crews to a geographic location in Michigan and they remain in that area (typically staying in hotels) until all work in that area is completed. We feel that this philosophy allows us to service our lakes well, without adding the additional overhead associated with multiple locations. Savin Lake Services currently employs (12) commercially certified applicators, and (6) additional team members.

Savin Lake Services utilizes technology in our company that is not available with any other aquatic management company in the state of Michigan. Our GPS technology not only controls the application rate of the products that we apply to lakes, but our GPS technology also allows us to ensure that we are neither overlapping nor missing areas on your lake. We can also provide you with an application report generated from our GPS system, so that you know exactly where we have applied herbicide products to a lake, for each application that we perform utilizing our GPS enabled boats. Savin Lake Services also provides mechanical removal (harvesting) of submerged aquatic vegetation utilizing our own fleet of vegetation harvesters, and our vegetation harvesters are equipped with GPS guidance systems so that we can ensure that we do not miss areas of harvesting on your lake.

We have built our business based on servicing our customers well, and our location will allow us to respond to any issues or concerns that may arise on Walled Lake within a (2) day timeframe. Our solid reputation speaks for itself. We are known for a high level of quality service, and we have a strong commitment to customer satisfaction.

3088 Hottis Rd. Hale, MI 48739    Hale: 989.728.2200    Clare: 989.386.0600    Fax: 989.516.5900

CORPORATE BACKGROUND (Continued):

Savin Lake Services manages our business so that we may complete all our initial aquatic herbicide lake treatments between May 15th, and June 15th, depending on the weather, water temperature, and aquatic weed growth on a lake. We then treat each lake every 4 - 6 weeks during the summer. We feel that this management philosophy is very important. It ensures that our customer's lakes are looking good for the entire summer season.

If chosen to continue as your aquatic weed control service provider, Savin Lake Services will annually mail the Michigan Department of Environment, Great Lakes, and Energy (MEGLE) required "7 Day Lake Treatment notice" to all property owners on Walled Lake to comply with the MEGLE requirements for this notice. Savin Lake Services will post each lake (at no additional charge) with brightly colored signs 8 ½" x 11" prior to any lake treatment. These postings explain the planned date of treatment, the type of treatment that we are using, and the water restrictions associated with that treatment. Typically, our treatments will require a (1) day restriction of swimming, and up to a (14) day restriction on watering lawns / irrigation from the lake. We will re-post the lake with different colored signs for each additional treatment that we perform. This offers the property owners a visual cue to realize that we have completed an additional treatment. The homeowners are responsible for removing the signs after all water restrictions have expired.

The products that we use for aquatic nuisance weed control are of the highest quality and used in the safest manner possible. All the products are registered by the Federal EPA (Environmental Protection Agency) and controlled by the Michigan EGLE. The required permits are issued by the Michigan EGLE, and Savin Lake Services will manage the application for these permits (at no additional charge). Savin Lake Services is licensed by the State of Michigan and carries all required insurances. License and insurance will remain in effect to cover the entire treatment season. All the employees of Savin Lake Services are well trained and hold commercial certifications.

Savin Lake Services will add the Walled Lake Improvement Board to our insurance liability policy as "additional insured" at no additional charge (see page 5 for copy of our Accord Page for our insurances).

3088 Hottis Rd. Hale, MI 48739    Hale: 989.728.2200    Clare: 989.386.0600    Fax: 989.516.5900

SAVIN LAKE SERVICES PROFESSIONAL STAFF:

Guy B. Savin, IV – President / Owner / Operator

Specialties: Lake management services, aquatic vegetation control, corporate strategic planning, full-lake aeration specialist, pond design and development. Education: B.S. Business Administration, Northwood University. Guy Savin has been involved with lake management for over twenty (20) years and as president he leads his team growing the business, attending trade conferences, and keeping current with regulations and lake management technologies. He is involved with the strategic direction of the company and is an active proponent of positive change within the industry. Guy is also an active member of many related organizations including the Secretary of the Michigan Aquatic Manager Association and the Midwest Aquatic Plant Management Society.

Paul Barber – Operations Manager/Regional Lakes Manager

Specialties: Lake and pond management services, aquatic and terrestrial vegetation control, project management, and fountain and aeration specialist. Paul Barber has been Certified Herbicide Applicator (including Category V and Category VI) for over 10 years and in that time, he has gained a vast amount of hands on experience in all fields of services that we offer. Paul attends and has completed numerous classes, trade conferences, and sales/service training seminars to further his education and stay up to date on the latest technologies and changes in the industry. As Operations Manager, Paul oversees daily operations to ensure tasks are completed in a safe and timely manner, within budget, and meet or exceed company standards. Paul is also responsible for coordinating project details, staff and resource scheduling, skills and safety training, annual follow-up treatment reporting, required posting, and our GPS technology equipped boats.

Matt Novotny – Environmental Scientist/Regional Lakes Manager

Specialties: Certified Herbicide Applicator (including Category V and Category VI), water quality technician, and Ecological Studies. Education: B.S. Geochemistry, Western Michigan University. Matt Novotny has a wide variety of environmental knowledge obtained through his degree at Western. He heads up our water quality division, completes EGLE permit applications for herbicide applications, and acts as a lake consultant. Matt is also responsible for all required permitting, and annual follow-up treatment reporting. Matt's versatility allows him to be a part of many aspects of Savin Lake Services.

**PROPOSED LAKE MANAGEMENT PLAN:**

Savin Lake Services will implement an integrated plant management plan to safely and effectively manage Walled Lake. We will continuously assess and study the ecology of the lake to prevent and identify any possible threats. Then evaluate which physical/mechanical, herbicide, and/or biological control method will be the most effective, economical, and feasible option that will eliminate or reduce the threat and positively impact Walled Lake's ecosystem.

**Management plan for 2021:**

Routine monitoring - Savin Lake Services Inc. will closely monitor the lake by conducting routine surveys and water quality studies. Conducting routine surveys and studies will result in early detection of potential threats to the lake. Early detection of a potential threat gives us the ability to be proactive instead of reactive in our management approach.

Utilization of selective systemic herbicides – Targeted plant communities will be treated utilizing selective and systemic herbicides whenever possible. By utilizing these types of herbicides, we can treat the entire plant of an undesirable targeted Invasive species and leave the non-targeted indigenous species unharmed. Plants treated systemically will not regrow, and by utilizing selective herbicides, indigenous desired plants are given the opportunity to thrive and outcompete the invasive plants. This method will reduce densities or areas Invasive plants can exist and reduces the risk of new infestations or re-infestations of invasive plant.

Invasive Plant Management – Savin Lake Services Inc. will aggressively attack the Invasive Plant communities that exist in Walled Lake with aquatic herbicides. Herbicide management is the most efficient and cost-effective way to manage non-native invasive plant communities.

Indigenous (Native) Plant Management – Savin Lake Services Inc. will utilize herbicides/algaecides to control nuisance indigenous plant and alga communities in near shore developed areas. If indigenous plants reach a nuisance level in offshore or undeveloped areas of the lake, we will integrate mechanical vegetation harvesting to remove the nuisance plants.

3088 Hottis Rd. Hale, MI 48739    Hale: 989.728.2200    Clare: 989.386.0600    Fax: 989.516.5900

### **Nuisance vegetation:**

The following plant communities are a potential threat to the health of the lake or reach a nuisance level which will require management on Walled Lake in the future:

Hybrid/Eurasian Watermilfoil - Invasive plant

Starry Stonewort – Invasive plant

Curly Leaf Pondweed – Invasive plant

Large Leaf Pondweed – Native plant

Clasping Leaf Pondweed – Native plant

Common Elodea – Native plant

### **Lake Surveys and Studies:**

Water Quality Monitoring Program – Water quality monitoring helps to identify and stop threats within the lake, determine overall condition of the lake, and what treatment actions need to be taken

Spring Visual Survey – This survey is to assess plant and algae growth, locate areas containing early season non-native plant communities (Curly Leaf Pondweed & Hybrid/Eurasian Watermilfoil), delineate treatment areas, and determine resources required and ideal timeframe for initial treatment.

Mid-Summer/Post Treatment Survey – This survey is to assess plant and algae growth and evaluate the efficacy of initial treatment. During this survey we will also locate areas containing non-native plant communities (Starry Stonewort or Hybrid/Eurasian Watermilfoil) that were not present during initial application and identify areas containing prolific algae growth or nuisance natives that will require management.

Fall Visual Survey – This survey is to assess plant and algae growth, identify plant diversity/species richness, determine if any areas of the lake contain any new infestations or regrowth of non-native plant communities, and determine if any additional treatment/management is required for the season. We also inspect the vegetation growth in all previous treatment areas and evaluate if any changes are required in our management approach.

3088 Hottis Rd. Hale, MI 48739    Hale: 989.728.2200    Clare: 989.386.0600    Fax: 989.516.5900

### **Management Timeline:**

Winter / Spring: Savin Lake Services will utilize the permit monies received to apply for the MEGLE permit.

Early May: A spring survey of the lake will be completed to determine areas containing Hybrid Watermilfoils a Curly Leaf Pondweed that require treatment.

Late May: Herbicide application utilizing selective systemic herbicides (2,4-D) coupled with Chelated Copper Bio-wash to control areas with Milfoil infestations. We will also utilize contact herbicides like Diquat Dibromide and Aquathol K to manage Curly Leaf Pondweeds

June: Aquatic herbicide treatment. Treatment date will vary from mid – June to late - June depending on the weed growth and water temperature. Savin Lake Services will utilize algaecides and contact herbicides like Diquat Dibromide and Aquathol K to manage various nuisance pondweeds and algae. Treatment will be scheduled so that the swimming restrictions will not impact holidays or weekends.

July: Post treatment Mid- summer survey. This survey will be to check efficacy of treatments and identify any other areas of the lake that may require treatment. We will also conduct an herbicide application for Starry Stonewort and any areas of concern found during survey.

August: Aquatic herbicide application. Savin Lake Services will utilize algaecides and contact herbicides for Starry Stonewort control and manage nuisance natives if needed.

September: Fall survey will be completed and if necessary systemic Milfoil will take place towards the end of the month

Fall: Savin Lake Services will issue a Fall Lakes Management Summary containing treatment reports, and a Lake Management Plan and recommendations for the following treatment season.

### **Planned Herbicides to be Utilized:**

Savin Lake Services anticipates utilizing the following aquatic herbicides on Walled Lake:

Diquat Dibromide - an aquatically labeled herbicide to manage milfoil & pondweeds.

Aquathol K – an aquatically labeled herbicide to manage pondweeds.

Hydrothol 191 – an aquatically labeled herbicide to manage pondweeds.

Copper Sulfate – an aquatically labeled algaecide for management of algae.

Citrine Plus – an aquatically labeled algaecide for management of algae.

Navigate – an aquatic herbicide in a granular formulation for management of milfoil.

Cygnat Plus – an additive that promotes efficacy of treatments.

3088 Hottis Rd. Hale, MI 48739    Hale: 989.728.2200    Clare: 989.386.0600    Fax: 989.516.5900

## PROPOSED FEES:

The below pricing is based on the indicated application rate for each product listed. The customer agrees that the unit prices named will be utilized for billing. Unit price adjustments shall be proportional to the unit adjustments in dosage (for example if 2-4D ester is utilized at 150 lbs. per acre then the billed rate will be 50% higher than the below quoted unit price). Prices for studies, treatments, vegetation harvesting, and/or other services rendered for Walled Lake will be as follows:

Systemic Milfoil Control (Navigate @ 150 lbs./acre)	\$ 665.08/ acre
Starry Stonewort Control	\$ 309.52/ acre
Contact Herbicides up to 2 gal./acre	\$ 266.83/ acre
Algae Control	\$ 59.71/ acre
Vegetation Harvesting (30-acre Minimum	\$ 437.04/ acre
Setup and mobilization fee for harvesting	\$ 3,000.00/ harvest
Annual report w/following year recommendations	\$ 775.00/ report
Bio Base Survey	\$ 3,650.00/survey
Visual Surveys	\$ 475.00/survey
Water Quality Studies	\$1,325.00/year
Annual EGLE Permit	\$1,500.00/year

## Estimated Budget:

Savin Lake Services estimates that total annual cost based on a price per acre basis will not exceed \$ 95,000.00. These estimated costs include all required treatments for algae, native and non-native plant communities, lake studies and surveys, reports generated, and the annual MEGLE permit fee.

3088 Hottis Rd. Hale, MI 48739    Hale: 989.728.2200    Clare: 989.386.0600    Fax: 989.516.5900

AGREEMENT TERMS:

**Proposal Terms:**

Any unforeseen change in State Regulatory Agency requirements concerning the implementation of any part of this agreement shall nullify this agreement.

Documentable aquatic management cost increases or decreases in excess of 3% per year may cause this contract to be re-evaluated in conjunction with the Walled Lake Improvement Board.

Savin Lake Services will not charge additionally for telephone conversations, meeting attendance, or an hourly rate for our staff. Those items are part of our standard operating philosophies.

**Payment Terms:**

An invoice for the permit fee will be billed in the winter of the previous year (ex: Treatments for 2021 will have the permit fee billed in winter of 2020). Checks will be paid directly to Savin Lake Services. Savin Lake Services will apply for the MEGLE permit through the State of Michigan once permit fee is received.

Following each treatment an invoice will be mailed or emailed. The invoice will show the date of treatment, acres treated, type of treatment, price per acre and total monies due. Invoice payment will be due in full net thirty (30) days after treatment date.

**Term and Termination:**

The term of this Professional Services Agreement shall commence on the signature date and shall continue for a period ending on December 31, 2021 or later with approved extension.

Agreement term extensions beyond calendar year 2021 at the amount of proposed price plus 3% are contingent upon the discretion of the Walled Lake Improvement Board.

If either party hereto fails to comply with a provision of this agreement, then the other party shall have the right to terminate this agreement by giving written notice of the default to the defaulting party and the defaulting party fails to cure the default within fifteen (15) days of receipt of said notice.

3088 Hottis Rd. Hale, MI 48739    Hale: 989.728.2200    Clare: 989.386.0600    Fax: 989.516.5900

LIABILITY ISSUES:

Dead and dying fish are an ugly sight. Truth is that most species of fish are relatively short-lived and have a high rate of mortality. Even large fish, too large to be eaten by predators such as bass and pike, experience a death rate of approximately 50% per year. Fortunately, the deaths are usually spread-out over the year and are rarely observed or become a problem except when concentrated as a fish kill. Only a fraction of the dead fish will ever be observed because many decompose on the bottom or are eaten by scavengers such as turtles and crayfish.

Most of the time, fish kills are due to natural causes over which we have no control, such as weather. Natural fish kills are of three basic seasonal types: winterkill, which occurs in late winter but may not be seen until early spring; spring kill, which occurs in late May to early June; and summer kill, which occurs on the hottest days of mid-summer. Savin Lake Services cannot be held responsible for fish kills, as most fish kills are natural fish kills.

The above information was taken from the DNR website. For more information regarding fish kills - please go here: [http://www.michigan.gov/dnr/0,4570,7-153-10364\\_52259-119822--,00.html](http://www.michigan.gov/dnr/0,4570,7-153-10364_52259-119822--,00.html)

POSTING OF TREATMENT AREAS:

Posting signs will be placed every 80-100 ft. along the lake shore in developed areas and undeveloped areas where we intend to treat. All launches and access sites will be posted. We will use brightly colored signs and the colors will be different for each treatment. Please do not remove these signs until the last restriction date has passed. We will try to post the signs the day before treatment occurs, however there are some occasions that signs do get posted the morning of treatment occurring.

NON - TARGET SPECIES:

Please be aware that we can only control weeds and algae that is present at the time of treatment. Emergent vegetation (cattails, bulrush, purple loosestrife), and lily pads require separate programs for control and are not treated unless specifically desired by the customer. We have no power over future weed and algae growth based on the current aquatic herbicides registered for aquatic use in Michigan.

3088 Hottis Rd. Hale, MI 48739    Hale: 989.728.2200    Clare: 989.386.0600    Fax: 989.516.5900

LILY PAD CONTROL (OPTIONAL):

This is an optional program for the treatment of lily pads in the lake. Lily pad treatments are not part of the quoted price. This service is optional. Per the EGLE (State of Michigan) regulations, an area of 40ft X 40ft can only be treated at each residence. Boat lanes to open water can be considered for treatment also.

WATER QUALITY MONITORING PROGRAM (OPTIONAL):

Water quality monitoring provides the basis for lake management. The water quality monitoring program can help Savin Lake Services to identify and stop threats within the lake. We provide a full-service program that will test for Secchi disk, temperature, phosphorus, dissolved oxygen, conductivity, total dissolved solids, pH and alkalinity. These tests will help to determine the condition of the lake and what treatment actions need to be taken. Savin Lake Services recommends that (3) sites be tested on your lake.

MECHANICAL HARVESTING (OPTIONAL):

Savin Lake Services will provide all necessary labor and materials to provide aquatic vegetation harvesting services utilizing our own vegetation harvesters. Price includes removal and transportation of aquatic vegetation to a location within (5) miles of Lake. Savin Lake Services will harvest to a maximum depth of 5 ft where practical. Harvesting cannot be performed in areas with less than 18" of water depth. Savin Lake Services will make all reasonable efforts to harvest as needed between docks, and as close as possible to shorelines. For safety reasons, our harvesting crews will not harvest within (10) ft of any boat / dock / raft etc. Please note that a suitable launch is necessary to launch and remove our vegetation harvesters from your water body. Our harvester / trailer combinations weigh between 12,000 and 18,000 lbs. Savin Lake Services will make every reasonable effort to remove our harvesters from your water body without additional charges. However, any additional costs associated for towing or removal of our vegetation harvesters due to poor launch conditions will be the responsibility of the customer.

Savin Lake Services will ensure that the launch area is kept clean and raked at the end of each day. All Savin Lake Services harvesters utilize a marine grade hydraulic oil for safety. The MSDS sheets for this hydraulic oil will be kept on site during any harvesting operations. All Savin Lake Services harvesters are equipped with GPS guidance systems so that we can ensure that we do not miss areas of harvesting on your lake. We will provide you a report at the end of each harvest which will indicate the exact area that we have harvested, and the total acres harvested. Savin Lake Services harvesters will pick up and collect most of the cut vegetation, however, it is important to note that some "cut and drift" vegetation will normally wash to shore during harvesting operations. We will work hard to minimize that amount of cut vegetation that washes to shore; however, it will be the responsibility of the property owners to collect and dispose of any vegetation that cannot be captured by our vegetation harvesters

**Savin Lake Services Equipment Listing & Team Members:**

**EQUIPMENT:**

- 12' Semi V hull aluminum pond treatment boat with 8HP Mercury outboard
- 12' Semi V hull aluminum pond treatment boat with 10HP Mercury outboard
- 14' Semi V hull aluminum lake & pond treatment boat with 15HP Mercury outboard
- 16' Semi V hull aluminum lake & pond treatment boat with 25HP Mercury outboard
- 19' Carolina Skiff fiberglass lake treatment boat with 60 HP Mercury outboard
- 16' Carolina Skiff fiberglass lake treatment boat with 60 HP Mercury outboard
- 17' Semi V hull aluminum lake & pond treatment boat with 40 HP Mercury outboard
- 20' Semi V hull aluminum lake treatment boat with 90HP Mercury outboard
- 20' Classic lake treatment airboat with Chevy 350 C.I. marine engine
- 2017 Chevrolet Tahoe with V Max trailering package
- 2017 Chevrolet Equinox – AWD with trailering package
- 2016 Chevrolet Silverado ½ Ton – 4x4 Crew Cab Truck
- 2014 Chevrolet Silverado ½ Ton-4x4 Extended Cab Truck
- 2011 Chevrolet Silverado ½ Ton-4x4 Extended Cab Truck
- 2011 Chevrolet Silverado 1 Ton – 4 x 4 Duramax Diesel Crew Cab Truck
- 2010 Chevrolet Silverado ¾ Ton – 4 x 4 Duramax Diesel Crew Cab Truck
- 2007 Chevrolet Silverado ¾ Ton - 4 x 4 Crew Cab Truck
- 2006 Chevrolet Kodiak 3 Ton – 4 x 4 Duramax Diesel Crew Cab Truck
- 2004 Chevrolet Silverado ½ Ton - 4 x 4 Extended Cab Truck
- 2003 Chevrolet S-10 – 4 x 4 Extended Cab Truck
- Liquid spray equipment including tanks, hoses, pumps, spray guns, etc.
- GPS coordinate mapping & application capabilities.
- Aquarius Systems H-220 Harvester (280 cubic feet capacity) – 5 ft. cutter head width
- Aquatics Unlimited Harvester (220 cubic feet capacity) - 8 ft. cutter head width
- Aquamarine H-650 Harvester (650 cubic feet capacity)- 8 ft. cutter head width
- (2) Aquarius Systems HM-420 Harvester (440 cubic feet capacity) – 7 ft cutter head width
- Vegetation Harvester (pontoon platform) for cut / float retrieval – 3 ft cutter head width

**TEAM MEMBERS:**

- Guy Savin – President & Commercially Certified Applicator since 2004
- Paul Barber – Operations Manager / Regional Lakes Manager & Commercially Certified Applicator since 2009
- Matt Novotny – Environmental Scientist / Regional Lakes Manager & Commercially Certified Applicator since 2012
- Jennifer Schroeder – Office Personnel
- Rhonda Sumeracki – Office Personnel
- Mike Kujawa – Pond Services Specialist, and Commercially Certified Applicator since 2010
- Daryl Sira – Certified Master Mechanic, Commercially Certified Applicator since 2018, and Harvesting Crew
- Sean Stevenson – Commercially Certified Applicator since 2017
- Mark Halfacre – Posting Crew & Commercially Certified Applicator since 2018
- Justin Tenbusch – Commercially Certified Applicator since 2016
- Kristian Hesling – Posting Crew & Harvesting Crew
- Ethan Hobson – Posting Crew, Harvesting Crew, & Commercially Certified Applicator since 2017
- Travis Zilliox – Harvesting Crew & Commercially Certified Applicator since 2018
- Joey Weber – Harvesting Crew
- Doug Weber – Harvesting Crew & Commercially Certified Applicator since 2019
- Dario Martinez – Harvesting Crew & Commercially Certified Applicator since 2020
- Mark Hooper – Harvesting Crew
- Caleb Barber – Posting Crew

#### **FIFE LAKE AQUATIC VEGETATION CONTROL**

---

##### **CLIENT:**

Fife Lake Nuisance Weed Commission  
Fred Joles - Former Fife Lake Township  
Supervisor - Weed Control Contact  
(231) 620-0098

##### **LOCATION:**

Grand Traverse and Kalkaska Counties, Michigan

##### **KEY SERVICES PROVIDED:**

- Lake Management
- Nuisance Weed Control
- 2,4-D granular application
- Diquat Dibromide liquid application
- Lily Pad Control

##### **PROJECT DURATION:**

2006 – 2021 (Contracted through 2021)

##### **TOTAL CONTRACT COST:**

\$575,000.00

---

#### **PROJECT DESCRIPTION**

The history between Savin Lake Services and Fife Lake actually dates back to 2006 when Savin Lake Services was awarded the lake management contract and aided in the establishment of a Special Assessment District. Ironically, a lake management and consulting firm selected a competing herbicide applicator in 2007 based upon the board's preference. Resulting from the public outcry originating from the dissatisfaction of the property owners in 2007, Savin Lake Services was awarded a multi-year contract in 2008 to return Fife Lake to its pre-2007 splendor. GPS generated application reports are provided at the conclusion of every visit. The systemic control philosophy that we have implemented has reduced the annually recurring hybridized milfoil population from 150 acres to approximately (10) acres treated per year. We have recently signed a five (5) year contract with Fife Lake for treatment through the 2021 season.

##### **CLIENT:**

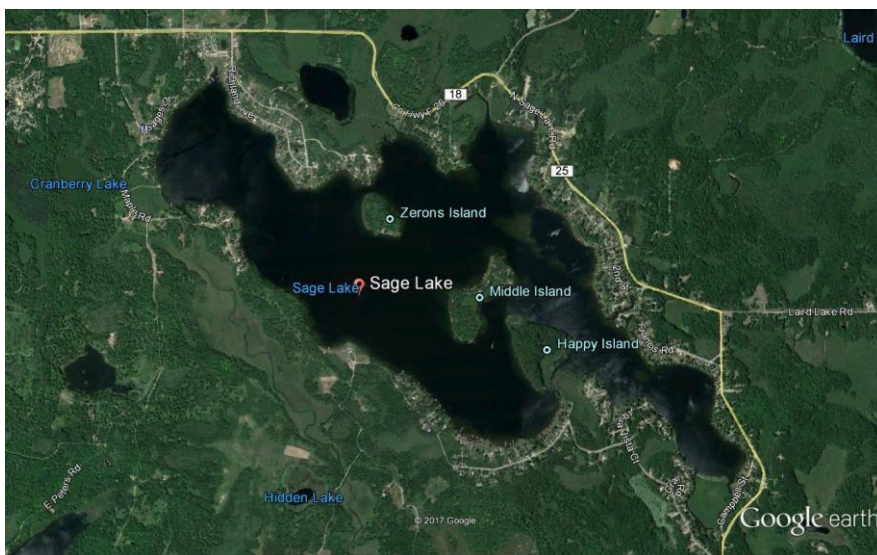

Sage Lake Association  
Jim Demmith  
(989) 473-2644

##### **LOCATION:**

Ogemaw County, Michigan

##### **KEY SERVICES PROVIDED:**

- Lake Management
- Nuisance Weed Control
- 2,4-D granular application
- Diquat Dibromide liquid application
- Aquatic Vegetation Harvesting
- Lily Pad Control

##### **PROJECT DURATION:**

2006 – 2022 (Contracted through 2022)

##### **TOTAL CONTRACT COST:**

\$1,533,750.00

---

#### **PROJECT DESCRIPTION**

Savin Lake Services' experience with Sage Lake dates back to 2004 with treatment primarily focused upon two (2) canals. Since then, (2) successive five (5) year contracts have been awarded to us spanning the ten years from 2006 through 2015. Sage Lake is a 785 acre moderately hard-water kettle lake located in Hill Township. There are approximately 57 acres of islands leaving a water surface area of 728 acres. Sage Lake has 38,371 feet of shoreline and it offers a unique lake management opportunity. Hill Township recently awarded Savin Lake Services another (7) year contract for Sage Lake.

**WALLED LAKE IMPROVEMENT BOARD  
2021 ANNUAL BUDGET  
PROPOSED**

<i><b>Description</b></i>	<i><b>Annual Budget</b></i>
---------------------------	-----------------------------

**Income**

City of Novi Assessments	\$61,090
City of Walled Lake Assessments	\$38,110
<b>TOTAL INCOME</b>	<b>\$99,200</b>

**Expenses**

Harvesting and Herbicide Treatments (including surveys and studies)	\$95,000
Permit Fee	\$1,500
Administrative & Legal	\$1,500
Other	\$1,000
<b>TOTAL EXPENSES</b>	<b>\$99,000</b>
